FISHING

SNG we specialise in the design and manufacture of Pelagic and Bottom Trawling products for the commercial market. We supply top quality fishing pots, rope, marine hardware, buoys and floats, safety equipment, electronics, gill nets and clothing. All of our products are carefully selected, guaranteeing durability and top quality.

AQUACULTURE

SNG supply a comprehensive range of consumables for the aquaculture market. Our unrivalled products, dedicated aqua centres and in-house experts ensures you have the best products and setup on the market.

INDUSTRY

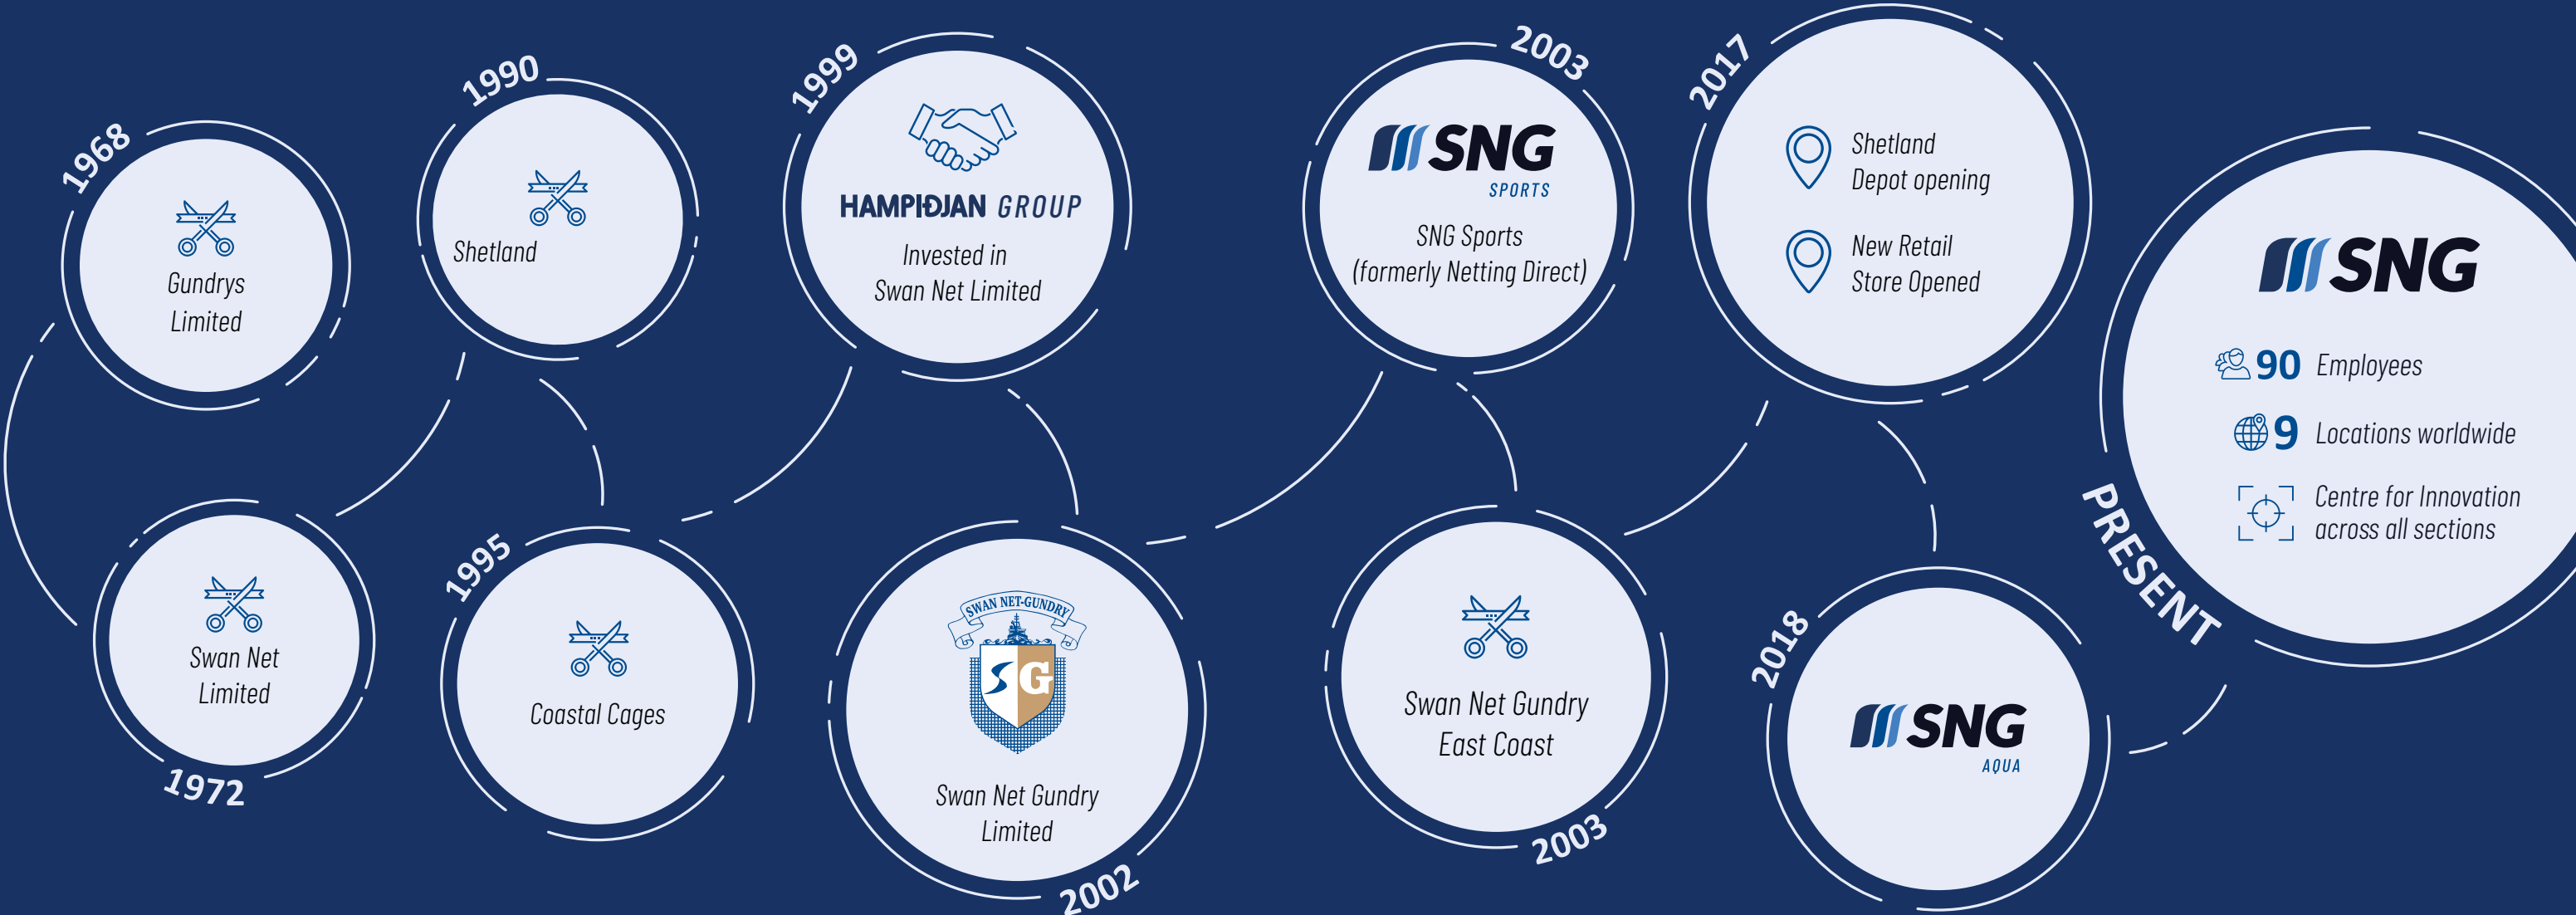

Our 50 years of fishing industry experience in net design, rope innovations and hardware development, has enabled us to offer our innovative products along with world class service and expertise to companies in the construction, agriculture, safety, offshore and public amenities.

SPORTS

AT SNG we are offer the full service in regards to your sports nets needs. After our onsite consultation process we design, manufacture and install your nets to your specific requirements. We cater for all structures, from steel to wooden. Our highly experienced team will guide you in the best solution for you club.

Where we came from

01

Fishing

At SNG we specialise in the design and manufacture of Pelagic and Bottom Trawling products for the commercial market.

We supply top quality fishing pots, rope, marine hardware, buoys and floats, safety equipment, electronics, gill nets and clothing.

All of our products are carefully selected, guaranteeing durability and top quality.

SNG Trawls

Our Pelagic and Bottom Trawl teams consist of the strongest and experienced designers in the industry. We pride ourselves in being at the forefront of trawl design and ensuring that we recognise problems that need to be solved before our customers do.

Experience and quality

With 50 years experience in design we ensure that there is continuous growth in our designs. Striving to improve is fundamentally at the core of any designer and that stands true at SNG.

The use of modern technology along side traditional methods has ensured that all aspects are taken into consideration when we build a trawl.

Pelagic

The SNG Pelagic Team specialise in the design and manufacture of fishing gear for the commerical fishing market.

We offer premium products to our customers which are developed from our extensive experience in the market and our global buying power through our partners.

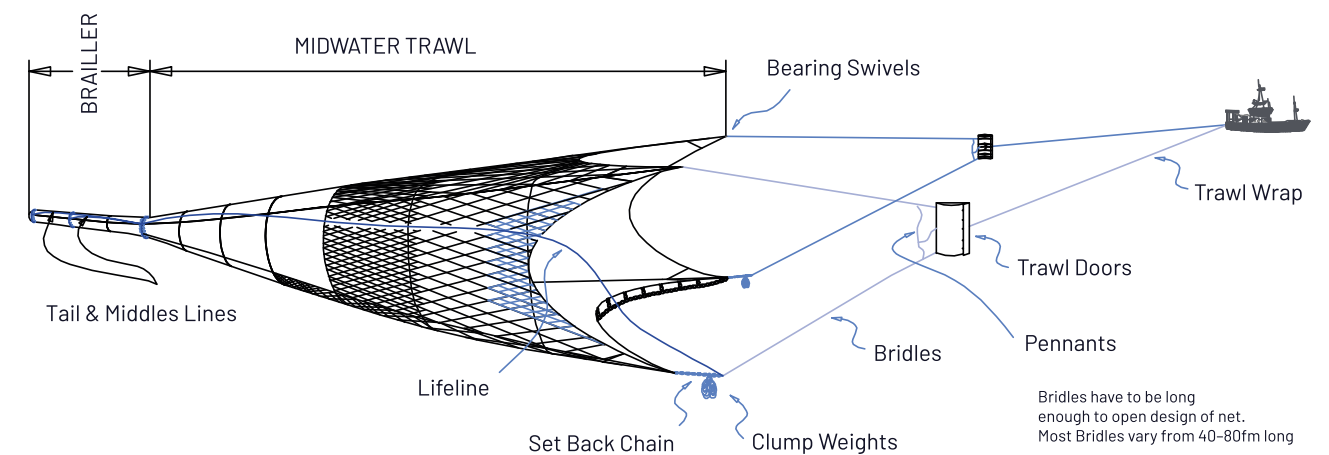

Pelagic Trawling

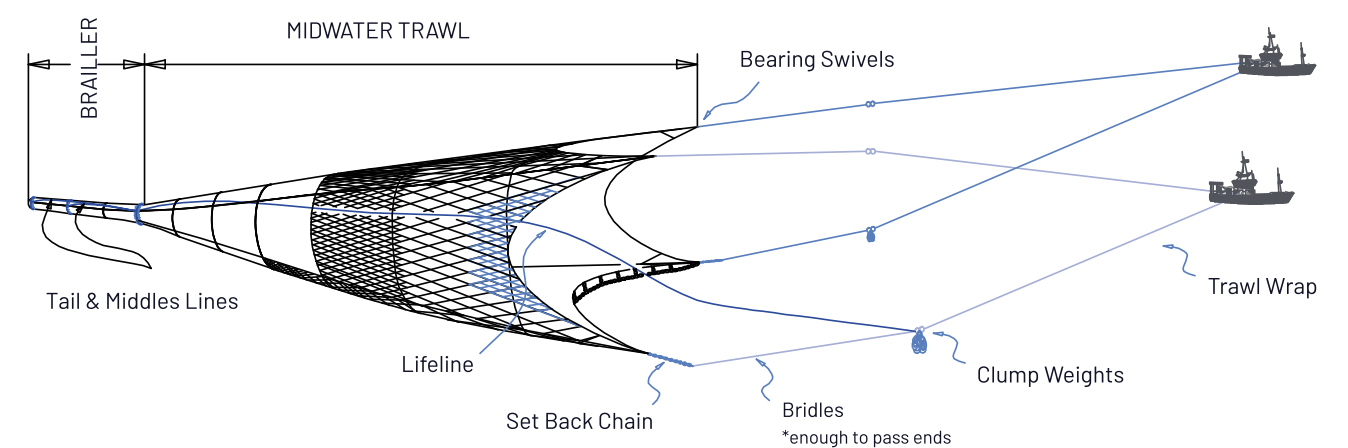

SNG has earned a global reputation for innovation and workmanship, designing and manufacturing a full range of pelagic gear. Our range includes the traditional designed right and left lay twisted twine front-end trawl, the always-reliable Pepa trawl and of course the very successful self-spreading trawls.

TYPICAL SINGLE RIG

Diameters of Ropes & Chandlery may vary with HP all variations can be supplied

TYPICAL PAIR RIG

Pelagic Fisheries

Our team have expert knowledge and experience in the following fisheries; mackerel, herring, horse mackerel, blue whiting, alaskan pollack, squid, tuna and redfish. Our solutions are proven in the industry

TRAWLS BOTH SINGLE AND PAIR-TRAWLING

The Design of all SNG Trawls are tailored to the fishing vessels specifications, the objective is for optimal towing speed while trawling.

Our designs are specific to the various target species. We use only the best quality products that the market has to offer, and as a result our trawls will have a longer life expectancy compared to trawls made with lesser quality products.

Helix self spreading technology, PEPA ropes, Nylex ropes, braided Nylon ropes and twisted Nylon both in RHL and LHL. These are our main products used in the construction of our trawls.

HELIX SELF SPREADING TRAWLS

These ropes have Hydrodynamic Technology; the trawl will shoot and haul easily and will keep its shape and continue to fish while turning. These trawls will come with four colours; blue head panel, red port side panel, green starboard side panel and yellow foot panel.

PEPA TRAWLS

These ropes are like the Helix but don't have the Hydrodynamic Technology feature. They will also shoot and haul easily. These trawls will come with four colours; blue head panel, red port side panel, green starboard side panel and yellow foot panel.

NYLEX TRAWLS

These ropes are made with nylon fibre and have a 12 strand construction, they are high in strength. These trawls will come with four colours; blue head panel, red port side panel, green starboard side panel and yellow foot panel.

BRAIDED NYLON TRAWLS

These ropes are made with nylon fibre and have a tight braided construction, the main features are the twine is water repellent, there is no shrinking or swelling of the twine and has a firmed and fixed diameter during use.

TWISTED NYLON TRAWLS BOTH IN RHL AND LHL

These ropes are made with nylon fibre and have a 3 strand construction, the main features are the twine is water repellent, there is no shrinking or swelling of the twine and has a firmed and fixed diameter during use. These trawls are most commonly used for pair trawling because of the added stretch factor.

TRAWL TUNNELS

In our trawls there are two options for the tunnels one being the conventional 4 panel version and the other being the 8 panel version. The latter option is the most popular choice because of the added benefits, these are a better water flow, more stability, added strength and increased mesh opening.

PUMPING CODENDS (BRAILERS)

- We make a wide range of pumping codends (brailer) again these are tailor made to suit the specific requirements of each vessel.
- Our designs are specific to the various target species.
- These pumping codends are made most commonly with nylon twisted, nylon braided. The netting types range from single, double, triple and quadruple construction.
- We use only the best quality products that the market has to offer, and as a result our pumping codends will have a longer life expectancy compared to pumping codends made with lesser quality products.
- Rings or no rings, our pumping codends have two options for running the splitter ropes. Option 1 is the familiar stainless steel ring version, and option 2 is a new concept of running the splitter through dynice handles attached to a Dynet band this creates more flair because the weight of rings has been eliminated.

- Dynet pumping section, this reduces shrinkage, the inside and cover is made with Dynet netting this makes the section light and easy to handle and to attach to the fish pump.
- Wider style pumping codends, with these we are having great success, with some international fish buying describing the fish quality as superb.

PUMPING CODENDS (RAMPING)

- We make a wide range of robust codends that are hauled up the ramp to the deck space for processing.
- These codends are tailor made to suit the pacific requirements of each vessel.
- Our designs are specific to the various target species.
- We produce codends in various mesh sizes that are required for the different species.

Bottom Trawling

At SNG Bottom Trawling we provide tailor-made solutions to our customers. All our designs are done to individual specifications. This consultative approach ensures that the Trawls are the most beneficial to our customers.

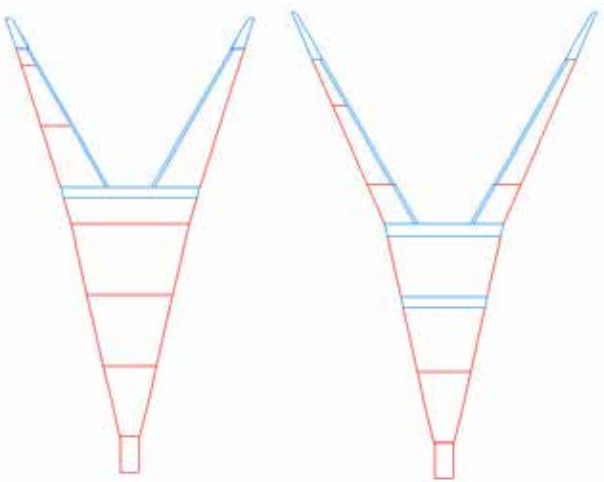

Products

We try where at all possible to provide multi-purpose trawls which work with different species. With our 50 years and more experience in net making our workmanship and quality of material is second to no other producer and manufacturer. Our trawls are built for longevity so to offer our customers the best economic value with the very best solution.

We cater for the following fisheries:

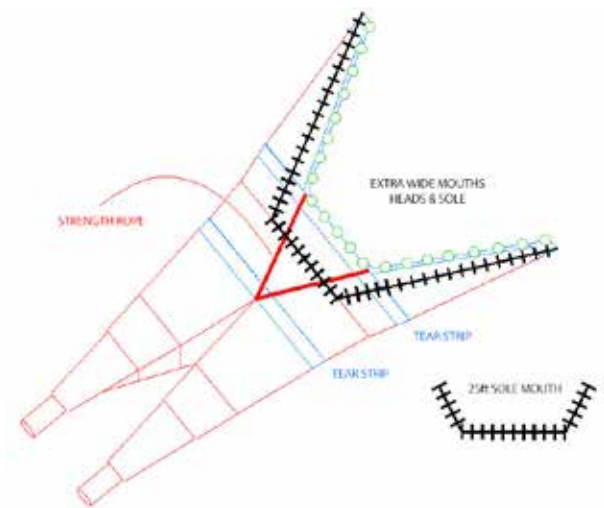

PRAWN

SINGLE BAG

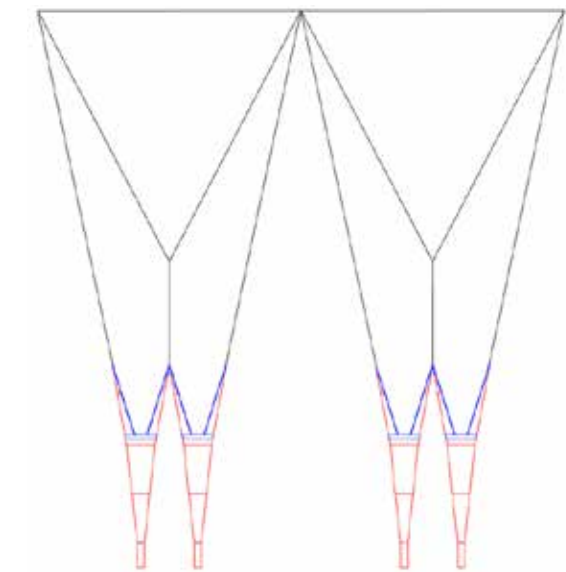

- This is a multipurpose trawl
- It offers ease of handling
- It is adaptable to different fishing terrains

TWIN BAG

- This trawl has excellent bottom contact
- It offers superior stability when this is needed
- It was developed for harsher deeper terrain
- It offers superior prawn quality as the catch is split and with diversion of weight it aids the trawl to fish longer

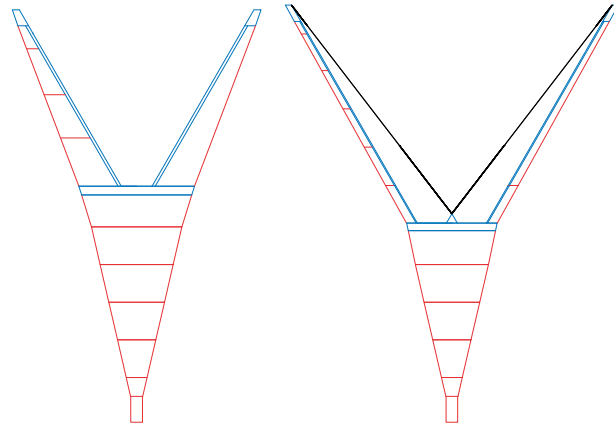

QUAD RIGS/HALF QUAD RIGS

- These trawls offer amazing adaptability to suit all ranges of vessels and conditions

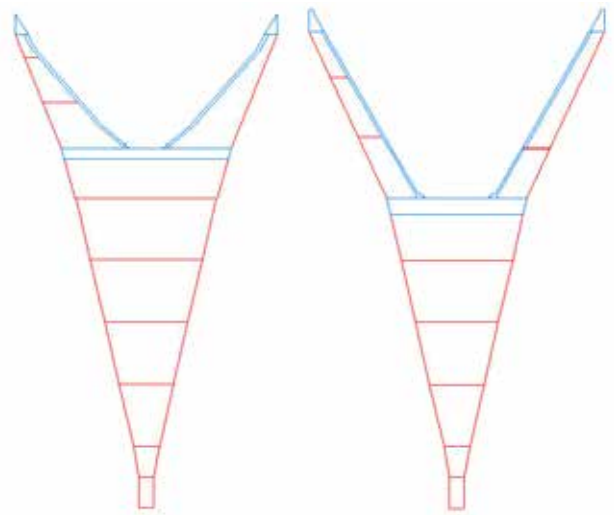

FISH

DOUBLE BOSOM TRAWL

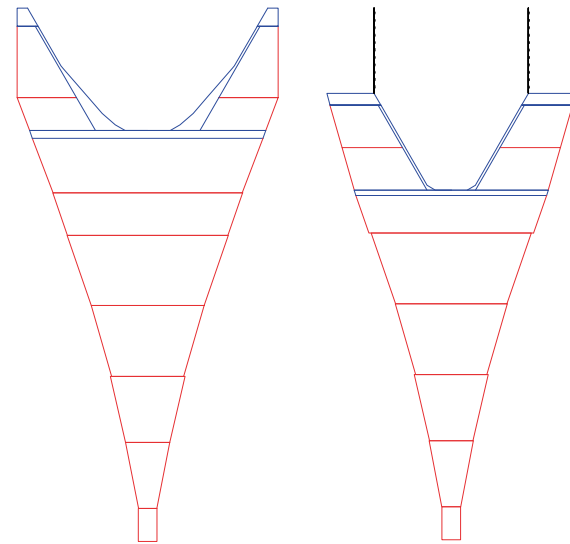

- Specialise in catching monkfish
- An added benefit of this trawl is the centre tongue and bridle which aids in elevating of fish for an easier catch
- Long wings and a large mesh is to help a larger trawl as it helps decrease resistance

DUAL PURPOSE

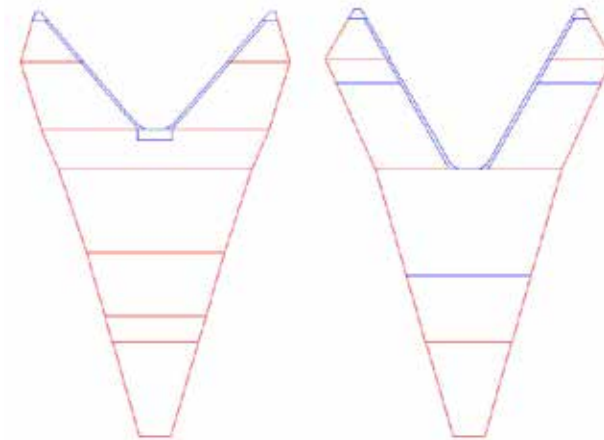

- This is specifically made for mixed fisheries where bottom dwelling and high rising fish can be caught by the same trawl

ROCK HOPPER

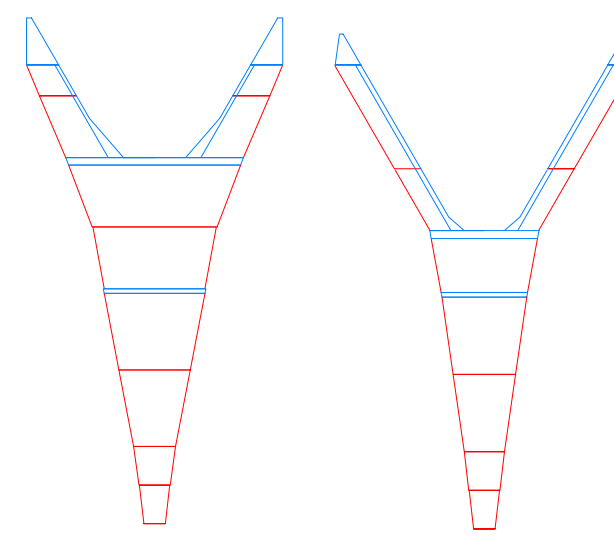

- Designed for difficult terrain
- Developed with large rubber footropes to access different areas
- Can be used for multi species
- The adjustable vertical height and different wing configuration is to ensure that fishing is optimised

SEINE NET

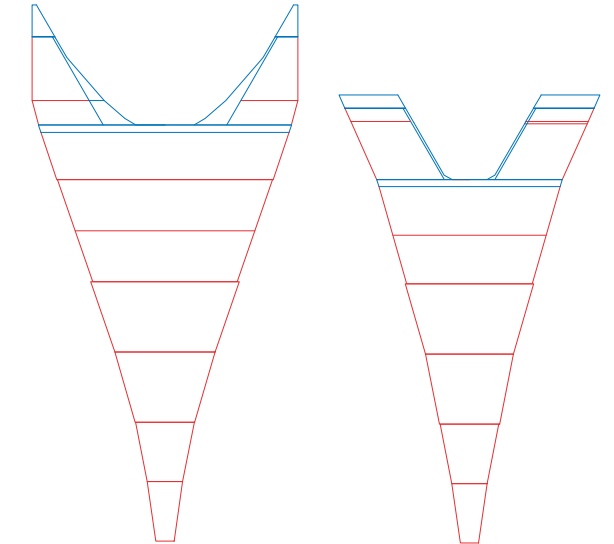

- Bottom and high fish
- This net offers excellent fuel efficiency as the boat is not towing

CUTTLEFISH TRAWL

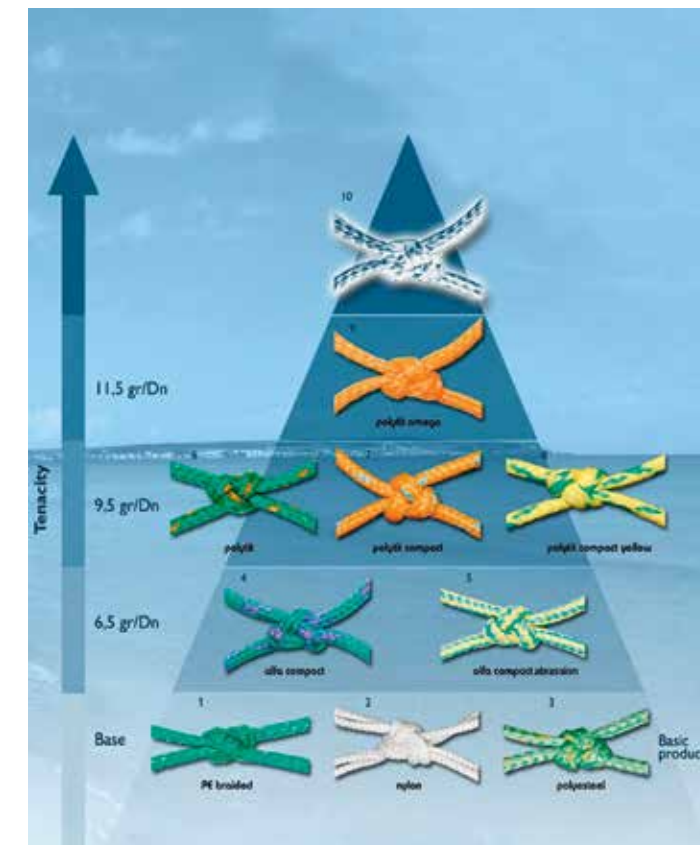

- This trawl was developed for harsher environments.
- The trawl is made extremely robust with a lot of added weight

SQUID TRAWL

- Developed with different footrope styles to suit each environment and to protect the net
- The high opening trawl is to increase fishing efficiency

High Tenacity Producers

1. **PE BRAIDED** SNG's most basic product is made from monofilaments 4.5gr/Dn
2. **NYLON** All types of nylon netting are offered, braided and twisted 8.2gr/Dn
3. **POLYSTEEL** Also offered the choice for polysteel netting made of fibres of 9.0gr/Dn, great abrasion resistance
4. **ALFA COMPACT** The latest advance in extrusion technology brings higher breaking strength and great abrasion 6.5gr/Dn
5. **ALFA COMPACT ABRASION** Codends developed especially for high abrasive surfaces of the sea 7.0 gr/Dn
6. **POLYTIT** This non-compact netting is made of 9.5gr/Dn High tenacity monofilament
7. **POLYTIT COMPACT** 9.5 gr/Dn doubles resistance of standard polyethylene netting
8. **POLYTIT COMPACT YELLOW** 9.5gr/Dn doubles resistance of standard polyethylene netting
9. **OMEGA** 11.5gr/Dn even superior breaking strength 11.5gr/Dn, great abrasion resistance
10. **DEVELOPMENT**

Pelagic & Bottom Trawl Applications

SNG supply a comprehensive range of high quality netting ranging from twisted nylon, braided nylon, dyneema to poly netting – all available in a wide range of sizes. All of our netting has been tried and tested by you our customers and has been proven to be of the highest standard.

Netting Types

BRAIDED NYLON NETTING

Braided netting made from nylon (polyamide) multifilament's with high elasticity and high breaking load and elongation to break.

The elasticity gives the netting a higher ability to meet extreme loads compared to other materials like polyethylene and polypropylene. Heatset and impregnated with best available materials to ensure stability and endurance.

TWISTED NYLON NETTING

Twisted twine netting with high elasticity and high strength obtained with accurate twisting levels, tensioning and heat setting after impregnation.

The nylon (polyamide) multifilament fibres used are of highest available quality and originated in Europe.

MAGNET GREY EXTREME KNOT

Braided high density polyethylene netting with maximum strength to diameter ratio to minimise drag during towing.

The twine is round and compact and core and cover are engineered to optimise knot breaking strength.

DYNET ULTRA HIGH STRENGTH NETTING

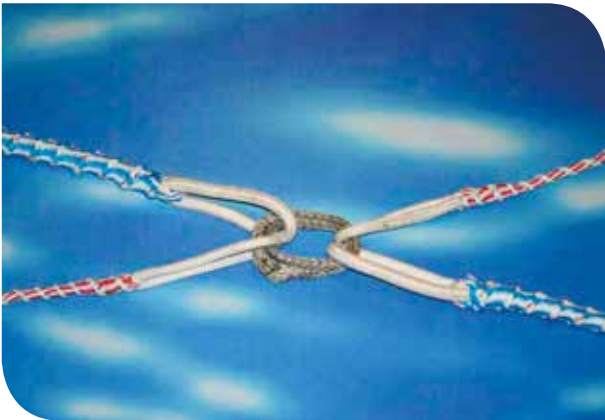

The Dynet is made solely of Dyneema® high performance fibres from DSM and impregnated with special solvent based material to increase stiffness and durability.

The netting knot is double and the twine design optimizes knot strength, knot stability and high durability. Lowest drag compared to any other knotted netting types.

Mesh Sizes

DYNICE LOCK HELIX

SPLICED MESHERS

SNG Prima Overbraid

- Extremely strong rope
- Abrasion applied from the overbraid
- This rope has been Over Braided with 12 strands of 6.5mm tight braid Dyneema twine. The abrasion quality of this rope is exceptionally high
- Comes in various sizes, strengths and colours
- This is customised every time for our customers.
- Applications are: bridles, lines and splitters

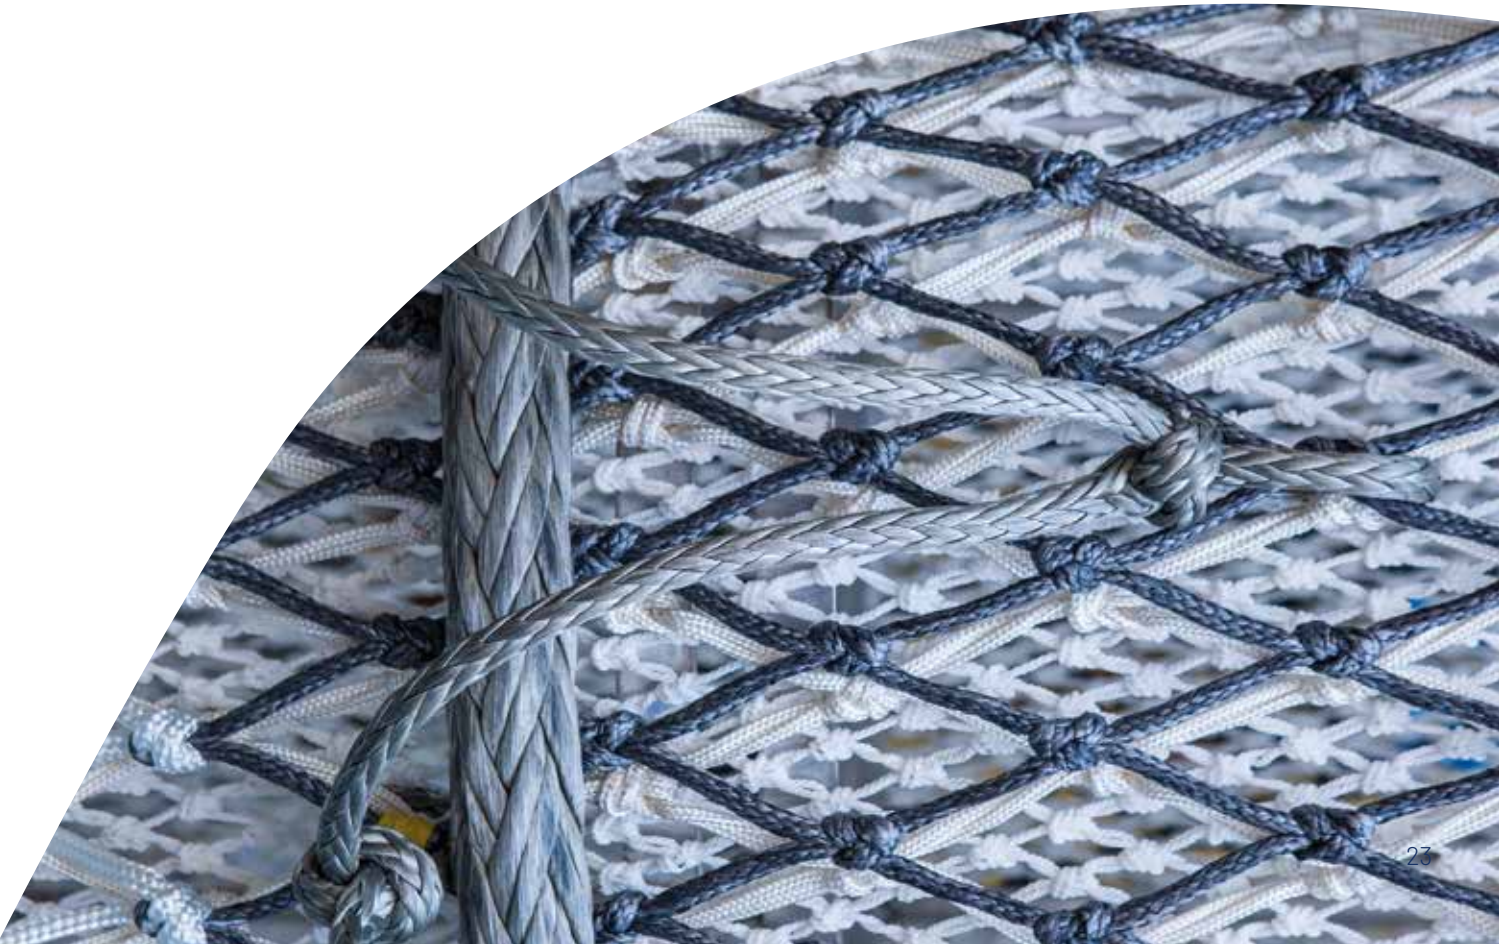

SNG Overbraided Footrope

This new style of footrope is a proven winner with both the strength and abrasion qualities being of an extremely high quality.

We use this rope on our trawls with a colour arrangement of green and red to signify Starboard side and Port side.

- 24mm Prima overbraided fFootrope
- This rope has a breaking strength of 55ton
- This rope has been over braided with 12 strands of 6.5mm tight braid Dyneema twine. The abrasion quality of this rope is exceptionally high.
- At intervals of 10 feet there are chain dropper points, one link of 13mm Tested Grade 80 Galvanized Chain. These links are attached with 10mm SK75 Dynlce Rope 10.7ton (3 turns through the link)

Rigging Applications

For our rigging ropes we use Dynlce with Dyneema (Certified by Lloyds of London); this is our preferred choice. We use these ropes for the following applications, life lines, codend lines, bridles, back straps, pennants and messengers.

These ropes come in array of sizes, they can be Dyneema Overbraided if preferred for extra protection and added life expectancy, there is also some colour options.

Dynlce Warps

Meet the world's strongest rope. Dynlce Warps are a revolution in trawling. They are a proven way in pelagic fisheries to reduce weight, increase trawl opening, improve handling and decrease oil consumption during trawling.

Dynlce Warps are the most advanced rope used in fisheries today, incorporating the newest synthetic high-performance fibres available and patent pending manufacturing technology and designs.

UNIQUE DESIGN

Dynlce Warps enhance trawl control, saves oil and last many times longer than steel warps.

A set of Dynlce Warps in a 40mm diameter weigh only 4000kg, compared to the 29 tonnes a set of comparable steel warps weigh.

Dynlce Data

Behaviour of headline cable during towing

There are three main forces acting on the head line cable. One is the sinking weight of the cable in sea, another is the drag of the cable itself and the third is the pulling force on the headline sonar which is fixed to the trawl.

When the pulling force is suitably adjusted the headline cable is taut and if steel wire is used it will slope bit down due to the weight. Dynlce Data will have similar slope but in the opposite and upward direction.

If there is a slack in the headline cable the steel wire falls down, it can touch the warps during turning and even fall into or below the trawl and damage it the warps.

Dynlce Data, due to its lightness will be pushed upwards by the drag and stay above the arps and the trawl.

Schools of fish in front of the trawl are therefore not cut through by the headline cable leading to reduced catch.

COMPARISON OF PROPERTIES

Steel Cable

- corrodes
- hard to splice if broken
- weight of 2.000 m in air is 880 kg
- weight of 2.000 m in sea is 676 kg
- density 4,47
- can damage trawls and Dynlce Warps
- lifetime about 1-2 years

Dynlce Data

- + no corrosion
- + spliceable
- + weight 2.000 m in air is 326 kg
- + weight 2.000 m in sea is 76 kg
- + density 1,35
- + will not harm trawls or Dynlce Warps
- + lifetime + 4 years

Rigging

DYNICE 60

Dyneema SK60 offers exceptional strength and axial stiffness. If thicker diameter is preferred for handling or holding instead of strength DynIce 60 can be a suitable choice.

DYNICE STANDARD 75

Conventional construction of 12 single strand braided rope from Dyneema SK75 impregnated with Durapur.

DYNICE 75

Reliable, proven and the most popular 12 strand braided rope of 100% Dyneema SK75 fibres impregnated with Duracoat for protection and improved abrasion resistance. Very suitable rope for all kinds of applications.

DYNICE 78

Low creep 12 strand braided rope of 100% Dyneema SK78 fibres impregnated with Duracoat for protection and improved abrasion resistance.

DYNICE 90

Very high strength 12 strand braided rope of 100% Dyneema SK90 fibres impregnated with Duracoat for protection and improved abrasion resistance.

DYNICE DUX

The name DUX is Latin and means the top of the class. This heat set outperforms Dyneema 75 – 78 and 90 ropes as its strength is far higher, all constructional elongation has been removed in the production process and the stretch characteristics are extremely low.

DYNICE ULTRABEND 75

The DynIce Ultrabend 75 is based on the new bending fatigue resistant fibre Dyneema XB0. The bending fatigue tolerance is up to 5 times higher than for DynIce 75 and therefore very suitable for running rigging which has to tolerate lot of bending under high load.

DYNICE ULTRABEND 78

The DynIce Ultrabend 78 is based on the new bending fatigue resistant fibre Dyneema XB0 with same low creep properties as SK78. The bending fatigue tolerance is up to 5 times higher than for DynIce 78 and therefore very suitable for running rigging which has to tolerate lot of bending under high load and high temperature.

TRAWL WARPS STEEL/FIBRE CORE

- Conventional steel core compacted warps, these come with added options of marks, thimbles and splices.
- Conventional steel core ordinary warps, these come with added options of marks, thimbles and splices.
- Conventional fibre core compacted warps, these come with added options of marks, thimbles and splices.
- Conventional fibre core ordinary warps, these come with added options of marks, thimbles and splices.

DATA CABLE

Conventional steel net sounder cables.

Repair Service

At SNG we are always focused on our customers and how we can ensure they are always able to do their business.

With this in mind we provide a world class Net Repair Service which is offered over 24/7 period.

Service Depots

Our experienced team are always available to ensure that our fishermen are on the water as much as possible.

Our service runs over 24 hours a day, 7 days a week. Our trucks are available to off load your damaged nets and bring them back, ready to fish in the quickest turn around possible.

We pride ourselves on the service we provide in this aspect of our business as we are very much aware of how crucial it is for our customers.

Trawl Innovation

SNG are a world renowned trawl maker supplying gear to all over the world.

We offer a full range of designs which are bespoke to suit each individual customer's needs.

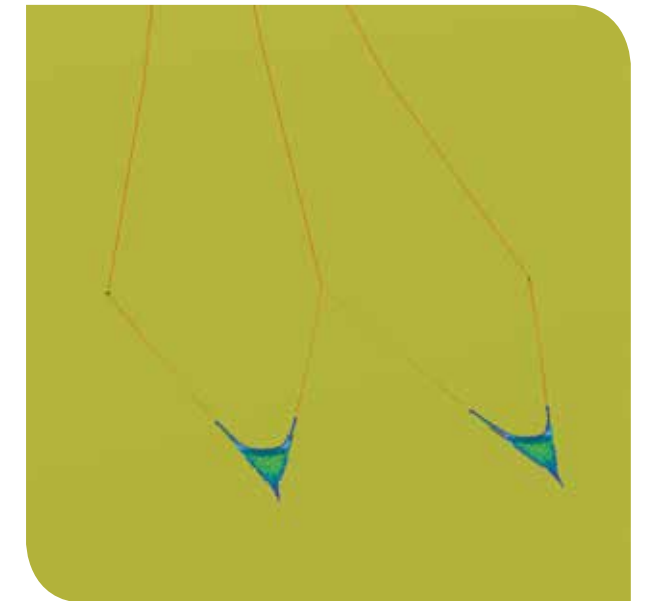

3D Simulation Design

As we evolve in our trawl design techniques our new 3D simulation application has aided us in providing real life experience on the actual trawl.

Our simulation software allows us to input all the parameters of a trawl gear; bottom trawls with two panels or more, pelagic trawls, twin trawls or more. The software simulates the mechanical behaviour of the fishing gear, while solving the momentum equations and taking into account the hydrodynamic forces applied to each part of the gear.

At the end of the simulation, which can last some minutes to several hours, depending on the complexity of the trawl gear, the results are available:

- The geometry; any distance and co-ordinate (eg. openings, door to door distance, depth)
- The forces: tensions in the rig, in the strengthening ropes and towing force

Flume Tank Experience

Investing in innovation is fundamental to the growth of our business.

The flume tank is an exceptional way for us to trial our new trawl designs in the tank and watch how it reacts to the water.

We develop our designs in conjunction with this and we can make real time decisions on aspect of our gear.

Inshore

SNG's Inshore Marine sector supplies a comprehensive range of products and services for the inshore fisherman. All of our products are carefully selected, guaranteeing durability and quality as we continue to improve our broad range of stock items to meet customer demand.

Services

Some of the services we offer include:

HAND SPLICING OF ROPES & WIRES

GILL NET RIGGING

WIRE CLAMPING

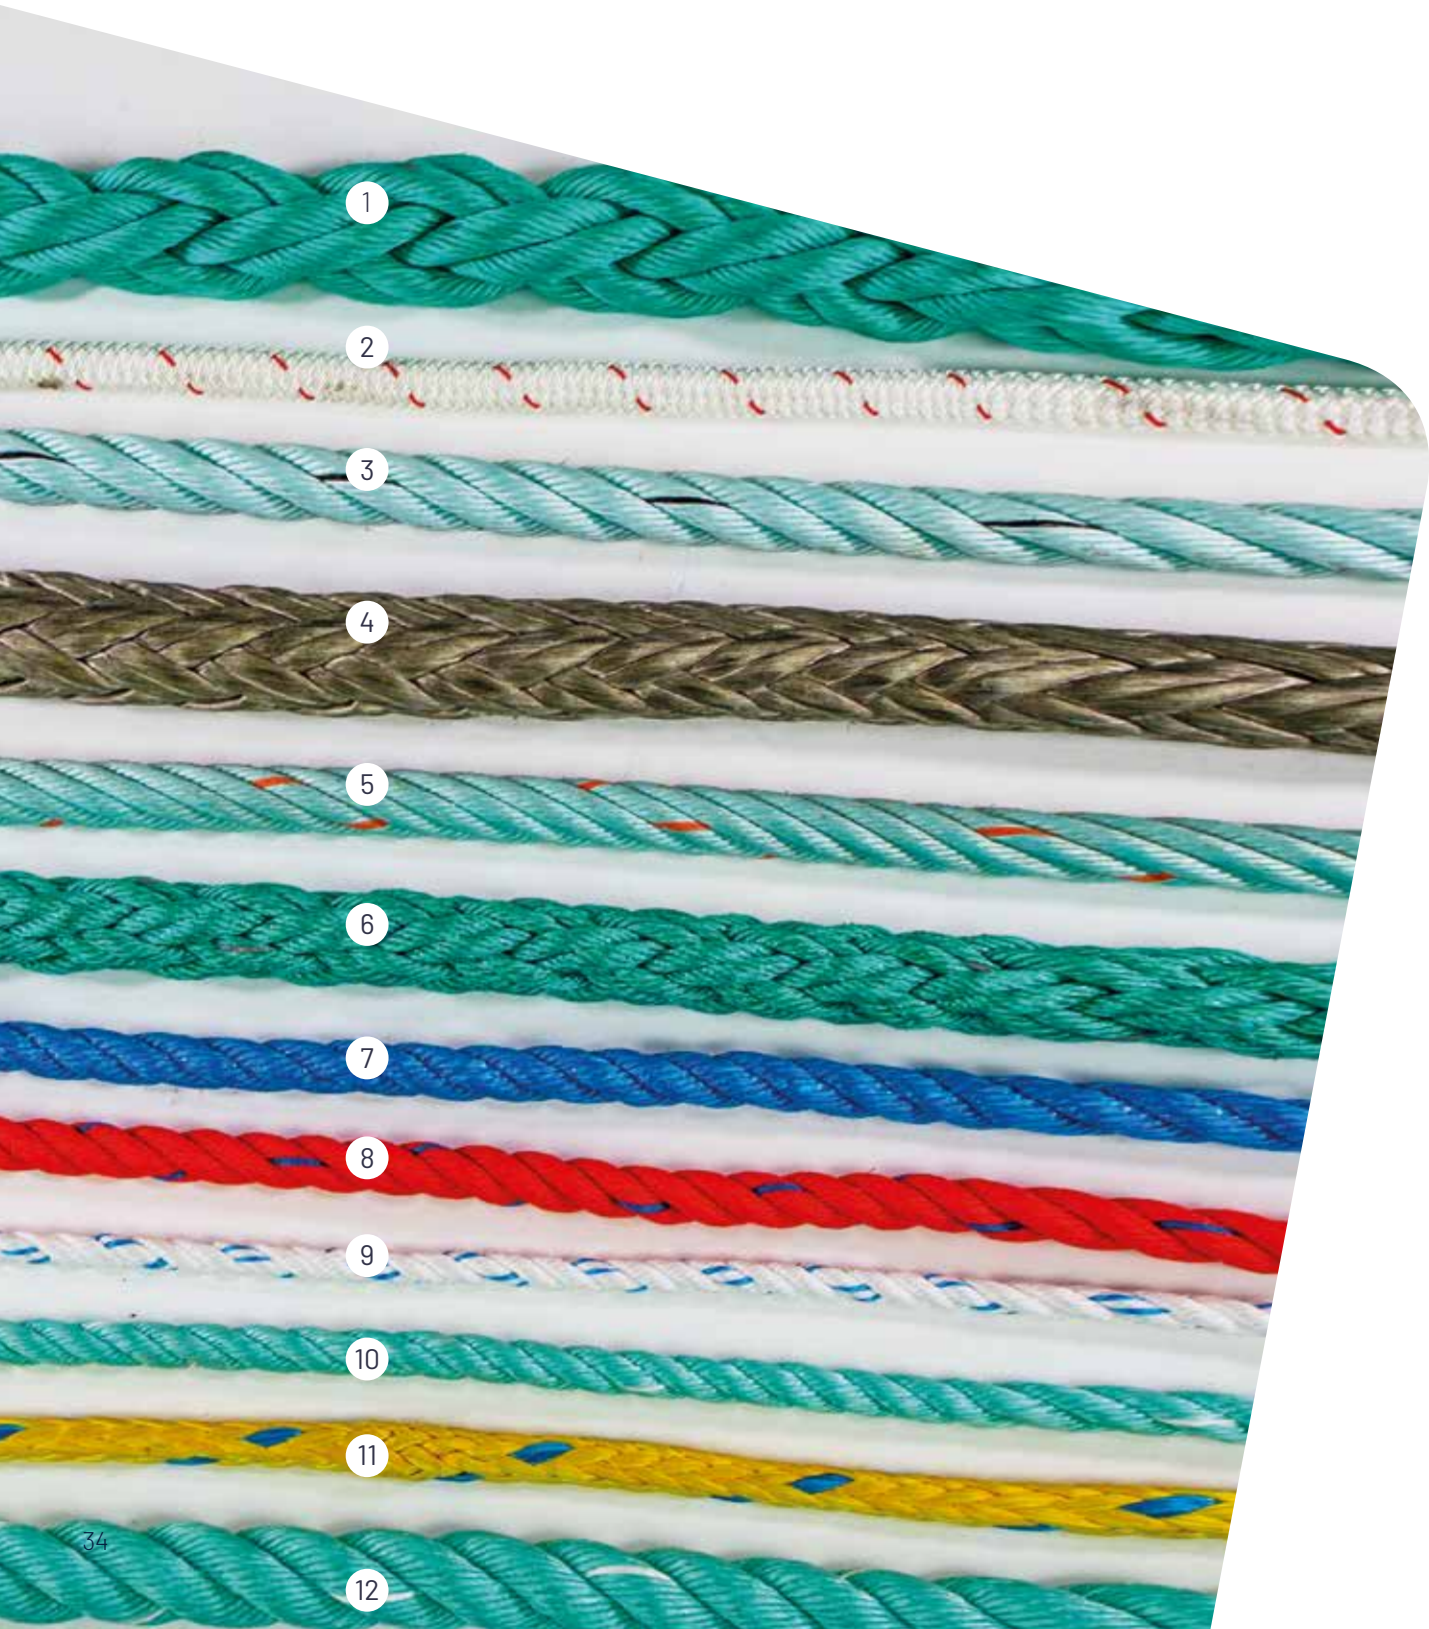

EPIRB PROGRAMMING & SERVICE

MOORING ASSEMBLIES

LIFE RAFT & LIFEJACKET SERVICING

Ropes

SNG supply a comprehensive range of ropes ranging from standard polypropylene ropes to high strength ropes such as Dynice. We monitor durability, strength, tenacity, etc., on a daily basis and with feed back from our customers we strive to supply superior ropes at competitive prices.

1 PLAITED SNG MOORING ROPE

Offers up to 35% higher breaking loads than ordinary polypropylene ropes. Top choice for winch and mooring lines. Compatible strengths to nylon ropes at a third of the price.

2 NYLON BRAID ROPE (COD END ROPE)

A double braided nylon rope consisting of a braided sheath over a braided core, used for single point moorings, towing springs and fishing ropes used also in trawl release guns.

3 4 STRAND COMBINATION

Offers top performance with high BL, long life and spliceability. The polysteel fibre strands remain on the wire cores to allow splicing and achieve maximum durability in the toughest conditions.

4 DYNICE

Widely used in commercial fishing, seismic mooring, tugging, yachting, lifting, leisure, off road and military sectors. The main focus of this 12 strand rope is its strength, smooth surface and roundness.

5 6 STRAND COMBINATION

These ropes are manufactured using a combination of polysteel fibres and wires with a wire rope core. The polysteel cover offers a high abrasion resistance, low stretch and high breaking load.

6 PLAITED POLYSTEEL

Offers excellent abrasion resistance. It's flexibility ensures ease of handling. It is extremely suitable for winch and mooring lines and is comparable with nylon products at a third of the price.

7 POLYPROPYLENE SPLIT

A multi-purpose rope with good breaking loads at economic prices. We also offer a superior version of this split film rope to most others on the market. It is manufactured in a three strand direct lay and three operation lay. It is also vacuum packed which is ideal in ducting applications, used by telecommunication companies.

8 POLYETHYLENE

Polyethylene rope has a positive buoyancy and it's strength remains the same - dry or wet. Polyethylene rope has a superior abrasion resistance and breaking load compared to common polypropylene ropes. Superb for use in blocks and sheaves.

9 OCEANFLEX EXTREME

Manufactured with new additives for extreme abrasion resistance with latest fibre technology. Extreme ropes sit excellent on the deck of a boat for ease of use no tangles. Extreme rope is the no 1 rope for fisherman who want a rope to outlast all other potting ropes.

10 12 OCEANFLEX

Smooth finish adding to its excellent storing capabilities on small vessels. Excellent breaking loads in small diameters. Excellent potting rope as the rope absorbs very little water. Excellent rope through haulers and sheaves - maintain its shape and strength. Excellent for abrasion

11 PRIMA

Vibrant yellow colour for excellent visibility. Acts as an ideal replacement for rough wires. Extremely light for manoeuvrability. Very easy to form hand spliced connection eyes. Prima can offer a very long life span compared to most ropes in the market.

13 BLACK PE BRAID

Braided Polyethylene (PE) twines are used for repair of nets of the same specification.

14 NYLON BRAIDED GREEN

Braided Nylon twine has strength and elasticity. Perfect for net making. Smaller sizes are used for rigging the nets.

15 NYLON MOUNTING TWINE TWISTED

Nylon twine has strength and elasticity. Excellent for net making. Excellent for rigging the nets.

16 COMPACT PE BRAID

Compacted Braided Polyethylene (PE) twines are used for repair of nets of the same specification. Tougher stronger twine than standard PE.

17 NYLON BRAIDED RED

High strength top quality Nylon Braids produced by Hampidjan. Ideal for trawl mending, lashings, mountings etc.

18 GREEN PE BRAID

Braided Polyethylene (PE) twines are used for repair of nets of the same specification.

Pots & Accessories

Lobster/crab creels has become the fastest growing sector within SNG due to the reputation our creel has obtained for its high catching power and durability.

The excellent workmanship put into completion of the creel including our renowned entrance eye makes it one of the most popular creels in the market today.

STANDARD RUBBERED POTS

Heavy duty commercial pots with side entry multipurpose catching ability. The soft nylon entrance eyes are designed to allow the largest of lobster and crabs to enter the pot.

ROPED TOP AND BOTTOM

Can be supplied in 8 or 10mm steel, comes with heavy black PE netting and a 15 bar base. Pot is roped on base for extra seabed protection. The pot can be supplied in 10mm or 8mm steel.

AQUAMESH

Aquamesh is a PVC coated, welded-wire mesh, specially designed for use in the marine environment. It has a proven track record in both the fishing and aquaculture industries. Aquamesh is produced in 100ft rolls in a range of widths, mesh sizes and gauges. This wire has proved very successful in the base of second-hand lobster pots to increase life and durability of the pot.

BANDS AND BANDING TOOL

Lobster banding tool for quick and easy mounting of rubber bands on to lobster/crab claws. Made of stainless steel.

ROPED POTS WITH SKI BAR

This is a relatively new pot on the market showing superb results so far. Comes in 22 or 24 inch with ski bar, three extra runs of 10mm plastic coated steel.

NETTED POTS

Available in 8 or 10mm plastic coated steel with 4.5mm PE netting. Fitted with soft eyes, bait bag, hook and rubber. This is the most basic version of pot supplied by SNG giving the owner the option of fishing the pot in its present state and roping the bars at a later stage. base gives extra life span and durability.

PARLOUR POTS

SNG supply three different types of parlour pots. These can be supplied with a rubbered or roped base in either 8 or 10mm steel. All our pots are 36 inches long and come with a sleeping compartment. Proven to be the most dynamic catcher of lobster on the market with superb holding power on the fishing grounds.

PRAWN POT & PRAWN PARLOUR POT

Supplied in 8mm plastic coated steel, covered with lightweight durable PE netting. These pots come with an 80mm nylon ring. The pot is fully bound with a 8mm PE rope for longer life.

SHRIMP POT

Moulded from extra strong polyethylene, comes complete with bait tube and door flaps. The most durable shrimp pot on the market. All accessories also available.

POT ACCESSORIES

We stock a full range of pot accessories to complement our vast selection of pots. All of our pot accessories are sourced from tried and trusted manufactures.

Buoys & Floats

Working in conjunction with the world famous Polyform brand, SNG supply a comprehensive range of buoys and floats. Designed to be tough, durable and reliable our buoys, fenders & floats are built for the most challenging marine environments.

A-SERIES POLYFORM BUOYS

This all-purpose buoy is widely used from small recreational boats through to large ships and commercial vessels highlighting the diverse range we offer.

LD SERIES

This bullet shaped buoy is especially designed to reduce drag when used in strong currents and tides. A heavy duty buoy designed for the commercial fisherman.

MOORING BUOYS

Supplied with a mooring rod through the centre, ring on top and swivel on the bottom. The rod is hot dipped galvanized making it an ideal mooring buoy for small craft.

DAHN BUOYS

Rotationally moulded buoys with a hollow core for flag poles or can be adapted into a mooring buoy.

F-SERIES FENDERS

Supreme quality twin-eyed fenders, moulded in one piece from tough flexible vinyl. The material is resistant to all weather conditions, mineral oils and highly light resistant. The number one choice of fender.

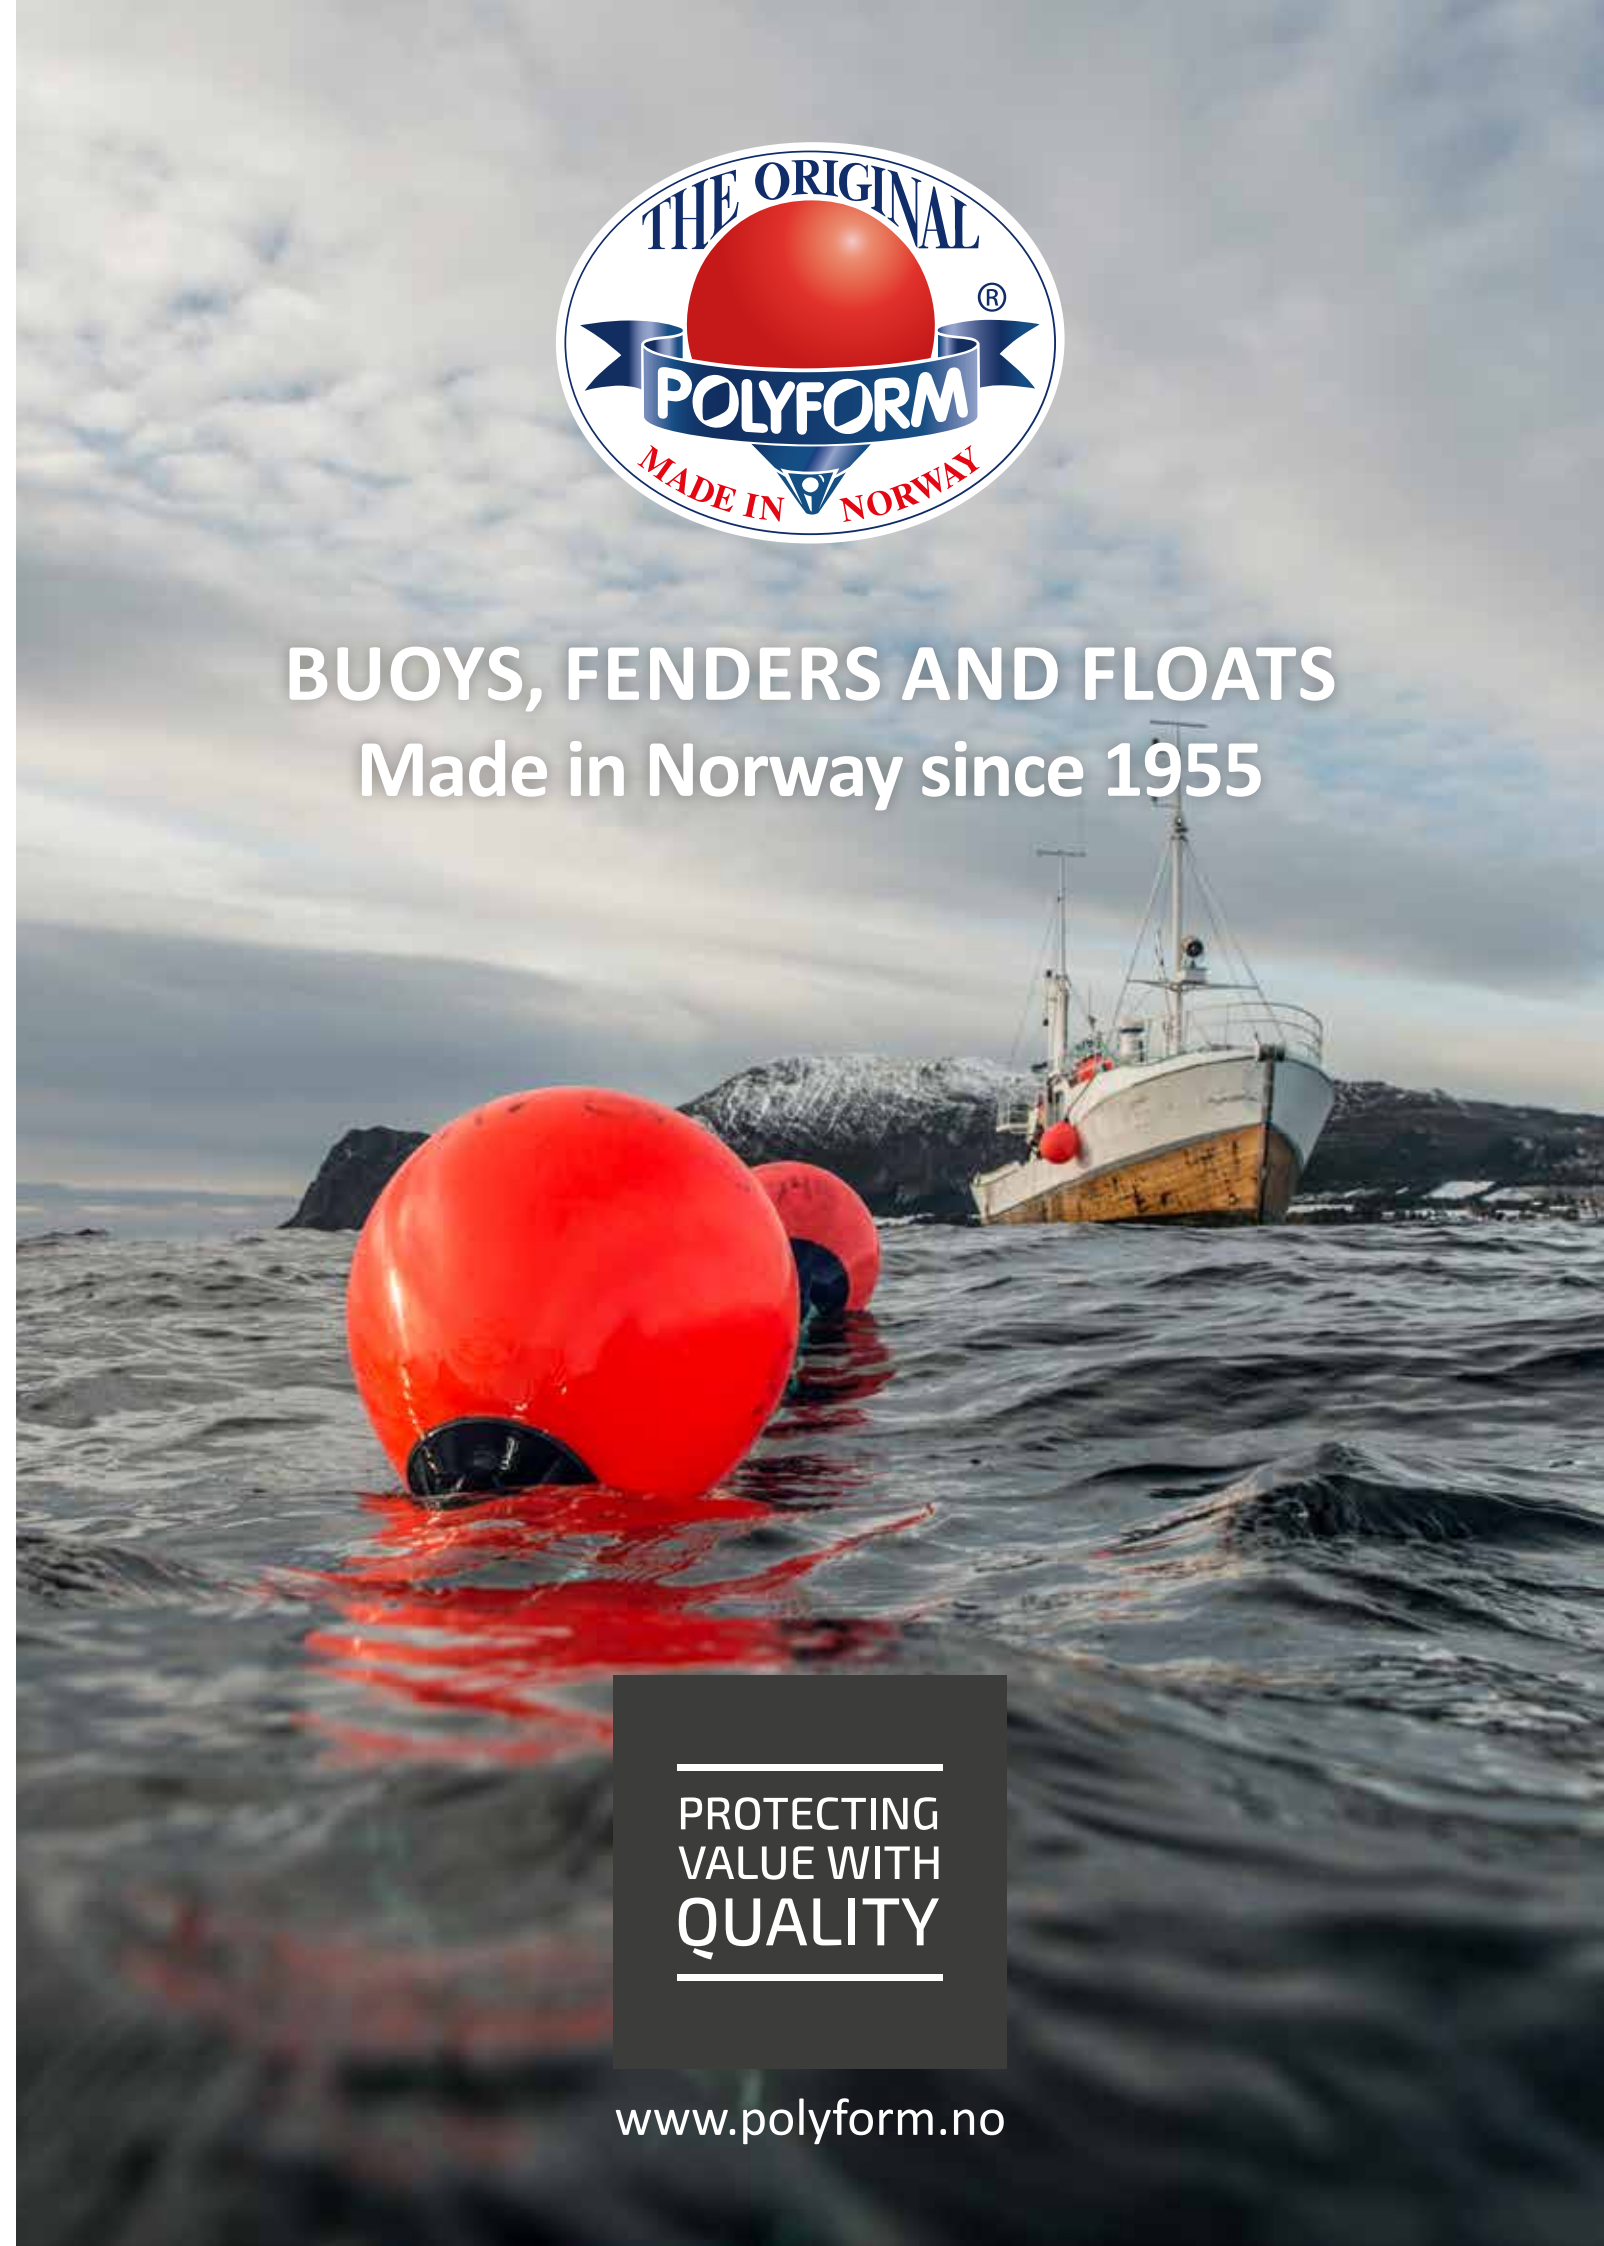

GILL NET FLOATS

A quality range of gill net floats are available.

BUOYS, FENDERS AND FLOATS

Made in Norway since 1955

PROTECTING
VALUE WITH
QUALITY

www.polyform.no

PNEUMATIC FENDER

Long lasting, super strength fender, made from 3 layers of rubber outside pressurised air chamber.

This heavy duty rubber fender is the number one choice worldwide for fendering larger vessels. It's robust construction, floating capabilities and lightweight manoeuvrability makes it ideal for commercial vessels.

TRAWL FLOATS FOR ORDINARY AND DEEP-WATER

Impact modified moulded trawl floats, suitable for deep-water and surface fishing applications. Contact our staff for any size float not listed.

Gill Nets & Leadline

We supply a comprehensive range of quality gill nets and leadline for flat fish, turbot, spider crab, cray fish, pollock, mackerel and trout, to name but a few.

Nets can be supplied in fully rigged formation or in sheet form.

Please contact our experienced staff for quotations and advice on twine strength, colour, depth, etc. See below some of our most common movers in nets and leadline.

Nets can be mounted to customer requirement:

- Fully rigged trout nets
- Fully rigged turbot nets
- Fully rigged trammels
- Fully rigged plaice nets
- Fully rigged bottom nets
- Fully rigged cod nets

Leadline:

- No. 1.5 Leadline | 2.3kg/100m
- No. 3 Leadline | 7.1kg/100m
- No. 4 Leadline | 11kg/100m

Visit our website
www.sng.ie

Marine Hardware

A comprehensive range of Marine Hardware is supplied through our distribution centres throughout the country. We supply products from world leading manufacturers such as Blue Line, Gunnebo and Van Beest to name but a few.

Our hardware is produced to the highest manufacturing standards in the industry. Certification of products can also be supplied on request. For any items not listed in this catalogue please do not hesitate to contact any of our outlets for availability.

FISHING CHAIN G80

High tensile grade 80 chain for towing and general fishing use.

SELF-COLOURED CHAIN

Mild steel, available in long link, suitable for mooring and general applications.

GALVANISED CHAIN

General purpose chain. These are available in Galvanised 30 - 70 in a variety of link sizes.

MOORING/SECOND HAND WEIGHT CHAIN

Suitable for shipping and mooring purposes. Second-hand chain also available. Moorings made in-house to customer specification for all sizes of vessel.

BLOCKS

SNG supply a wide variety of blocks, for both fishing and shore industries. We stock the world renowned blue line range which is the first choice for commercial fishermen. Blocks are supplied in nylon or steel sheaves and can come with galvanised housings of cast steel. The SNG ranges of blocks are suitable for a variety of heavy load applications. We can also supply larger trawl blocks for a variety of vessel size and horsepower.

GUNNEBO CONNECTORS

Hot dipped galvanised and yellow painted G80 Connectors, manufactured in Sweden by the renowned Gunnebo Lifting Group. These connectors are the No.1 choice on vessels and store based users for strength and reliability.

Visit our website
www.sng.ie

BUDGET CONNECTORS

SNG also offer a high quality connector supplied by the No.1 Fishing Supplier.

This connector has proved successful for the whitefish fleet who in turn use large volumes of connectors per annum and where value for money is a premium.

CONNECTOR PUNCHES

Punches made from hardened steel for separating assembled connectors.

BOW BLUE SHACKLES

Good quality test blue shackles. They are used in commercial fishing.

D BLUE SHACKLES

Same qualities as the bow shackle, used in commercial fishing to replace connectors

BROWN PIN, BOW, GUNNEBO SAFETY SHACKLES

These high quality certified shackles can be supplied in Bow or D-Shape and can come with a safety nut side or countersunk with eye pin. This is the No.1 lifting shackle on the market.

STAINLESS STEEL D AND BOW TYPE SHACKLES

Marine grade 316 stainless steel shackles ideal when non-erosion is required and easy opening.

ZINC ALLOY WELD-ON/ BOLT-ON HULL ANODES

Corrosion may be defined as the deterioration of a metal due to a reaction with its environment. For corrosion to occur, areas with different electrical potentials must exist on the metal surface. An electrical current will flow between the water and fittings made of different metals, causing some of them to corrode away. On wooden and GRP boats the propeller, shaft, p-bracket and skin fitting are at risk, while on a steel hulled vessel the whole underwater area is vulnerable to costly and potentially dangerous damage. Hull Anodes are used and designed to prevent corrosion of the entire immersed steel hull area, including exposed shafts, brackets, rudders and propellers.

STAINLESS STEEL SWIVELS

Made in-house by the famous Blue Line Company of Denmark. These swivels are the most commonly used by commercial end users. Can be supplied also in a flex version.

BALL BEARING BLUE SWIVELS

Used on trawlers and heavy lifting assemblies for keeping twists and turns out of heavy duty wires and ropes.

SAFETY BK HOOKS

The most conventional lifting hook on the market, used extensively on fishing vessels and also for onshore industrial use.

SAFETY OBK HOOKS

This hook provides extra safety on the latch device making it harder for the hooks to spread or open.

SAFETY BKL HOOKS

Supplied from the same family as the BK and OBK hooks but complete with a swivel head for use on cranes and lifting derricks where it is essential to keep the ropes from twisting.

**HOT DIPPED
GALVANISED**
AVAILABLE
ON ALL OUR
SAFETY HOOKS

SLIP HOOKS (QUICK RELEASE)

Manufactured by Markussens of Denmark and supplied with safety locking carbine hooks. Can be supplied with reinforced tops.

VIKING G HOOK

VIKING G SPLIT HOOKS

LOAD BINDERS

Ideal for easy and efficient tightening of chain, used for lashing purposes. Designed to be easily operated using one hand only.

VIKING FLAT LINKS

An ideal lifting or pulling component. Made from high tensile steel and yellow painted, this link provides a good opening space for connecting chains or draglinks.

CHROME SPLIT LINKS

CARBINE CLIPS

These versatile hooks can be supplied zinc coated or stainless steel. They can also be supplied with a safety screw collar zinc coated or stainless steel.

STAINLESS STEEL QUICK LINKS

FOLDING ANCHORS

Hot dipped galvanised anchors, complete with 4 folding claws. Suitable for storing on smaller vessels and offering superb holding power when deployed.

BRUCE ANCHORS

This cast steel and hot dipped galvanised anchor is a low cost alternative to the successful "M-Type" anchor. Once again excellent holding power in sandy, muddy bottoms.

STAINLESS GRAPNEL ANCHORS

Made from 316 stainless steel this a must for any fishing or pleasure boat. Ideal for catching ropes, etc.

4 FLUKE ANCHORS

The No.1 choice for shrimp and crab fishermen. The largest holding power of all anchors which is suitable for all types of fishing grounds complete with an extra rope ring for fast retrieving. Extra welding and galvanisation makes for a superb anchor.

FISHERMAN'S ANCHOR

The traditional 2 fluke anchor for small craft and fishing boats. Suitable for rocky ground.

BLUE WIRE THIMBLES

GALVANISED THIMBLES

Manufactured from mild steel and hot dipped galvanised.

WIRE GRIPS

WIRE SPIKES

We provide a range of splicing tools for convenience when hand splicing hard lay materials.

Safety is a fundamental part of this. We offer the full range water safety services at our safety service stations in Killybegs, Co Donegal and Castletownbere, Co Cork.

- Ideal for offshore and extreme conditions
- Designed to combine optimum safety and comfort
- Bladder designed for optimal head support when inflated
- Jacket is designed and tailored to the contours of the wearer for a snug fit
- Actual Buoyancy = 320N
- Complies to EN ISO 12402 Standards

- Available in hammer or Halkey Roberts mechanisms
- Durable wipe clean front and comfortable to wear
- Stainless steel belt buckles
- C/W Crotch strap
- Actual Buoyancy is 175N and complies to EN ISO 12402 Standards

We are a distributor of the BIM lifejacket with integrated PLB and provide customers with assistance in getting through the Code of Practice Survey and the BIM grant application process.

SNG supply all safety related products listed on the BIM Safety Grant Scheme. When Vessel Owners go through a code of practice or survey, they are entitled to avail of a 40% or 60% grant against good purchased for the code of practice.

SNG is also a service distribution centre for BIM lifejackets. Customers can avail of the purchasing, servicing and up grading of these jackets. For quotations, grant and MMSI application forms please contact us directly.

SNG are a distributor for the world renowned Hansson Pyrotechnic group of Sweden.

This pyro has a distinct advantage to its competitors as its time expiry date is 1 year longer than other brands. SNG have secured the capability of holding large amounts of pyro with the local authorities and the department of justice in our custom built pyro store.

This gives us the advantage of holding large quantities and classes of pyro required for the marine and leisure markets. This is also gives us the ability, in co-operation with the department of defence, to dispose of time expired pyro technics. If costumers are purchasing new pyro from SNG and have old pyro outside of the Hansson brand we can still provide the disposal service for these.

- Wipe clean front
- C/W S/S D rings and buckles
- Automatic and manual inflation systems available
- Comfort collar padding to the back of the neck
- Actual Buoyancy is 172N and complies to EN ISO 12402 Standards

We supply a range of EPIRBs, PLB's and SARTs. In-house programming and service of all beacons available from our trained staff. We supply an ACR Category 1 type PLB (simple two-step activation) which conforms to the requirements of the Code of Practice for all vessels under 15m, without the need of being integrated into a lifejacket.

We offer a full range of Liferrafts from 4 Man to 50 Man for sale or hire. Department of Marine approved. Liferaft service station offers a quality service and quick turnaround. Contact any of our staff for details.

Electronics

We supply the full range of Garmin marine electronic products and accessories, other brands available include Simrad, Furuno, Raymarine, Lowrance, McMurdo, Koden, Standard Horizon, ACR, Humminbird, Icom and Nasa to name but a few.

FISHFINDERS & PLOTTERS

We stock a wide array of fishfinders and plotters to make fishing that little bit easier for you. Our range includes the leading brands including Garmin, Humminbird, Raymarine and more.

GPS SYSTEMS

We stock the finest range of GPS devices available on the market.

SPORTS WATCHES

Our range of sports watches allow you to check the tides, monitor moon data, temperature and air pressure, as well as and having built in compasses.

GARMIN ECHOMAP PLUS COMBO

This is the 65cvw it is available in 45cv and 75cv

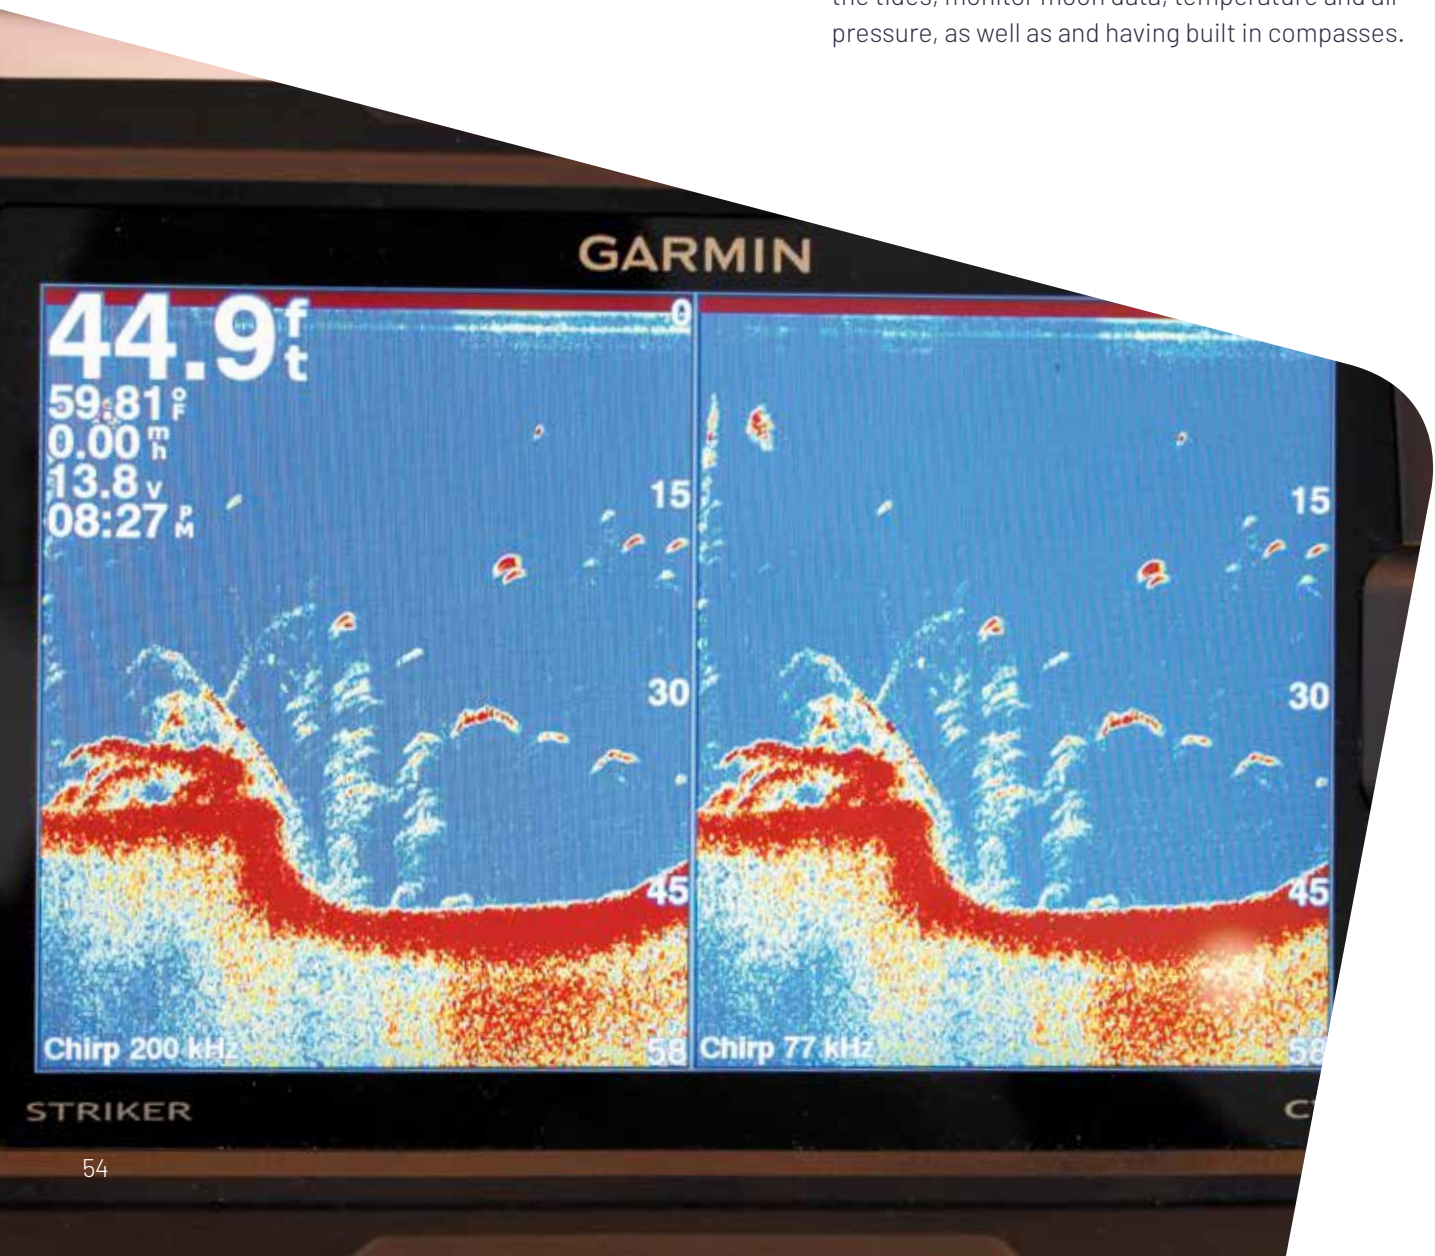

- Bright, sunlight-readable 6 inch combo
- Built-in support for Garmin CHIRP traditional sonar plus CHIRP ClearVü™ scanning sonar (transducer sold separately)
- Preloaded BlueChart® g3 charts for the United Kingdom, Ireland and Northwest mainland Europe coast
- Built-in Garmin Quickdraw™ Contours mapping software instantly creates personalized fishing maps on-screen with 1 foot contours as you fish
- Use built-in Wi-Fi® to pair with the free ActiveCaptain™ app for access to OneChart™, smart notifications1, Garmin Quickdraw™ Community data and more
- Share waypoints and routes with other ECHOMAP™ or STRIKER™ units

GARMIN STRIKER PLUS 4 FISH FINDER

The Garmin Striker Plus 4 fishfinder with a bright 4.3" display and built-in GPS features Chirp sonar for crystal-clear images and Quickdraw Contours map drawing software, which stores up to 2 million acres of content with 1-foot contours. The built-in GPS lets you mark and navigate to waypoints and shows your boat's speed.

- Includes dual-beam transducer with Garmin CHIRP traditional sonar for crystal-clear images and remarkable target separation
- Built in Garmin Quickdraw Contours mapping software lets you create and store maps with 1-foot contours for up to 2 million acres
- Built in GPS lets you mark waypoints, create routes and view boat's speed
- Bright, sunlight-readable 4.3" display and intuitive user interface

GARMIN STRIKER PLUS 5CV SOUNDER

5" GPS Fishfinder with Industry-leading Sonar and Quickdraw Contours Mapping Software

- Includes transducer for built-in Garmin CHIRP traditional sonar plus CHIRP ClearVü scanning sonar
- Built-in Garmin Quickdraw™ Contours mapping software lets you create and store maps with 1-foot contours for up to 2 million acres
- Built-in GPS lets you mark waypoints, create routes and view boat's speed
- Bright, sunlight-readable 5" display and intuitive user interface
- Rugged design for every fishing environment

ICOM IC-M25

Weighing only 220g, the lightweight IC-M25 is convenient in size and use. With an LCD display 30% larger than its predecessor and a simple user interface, it clearly displays large channel number and status icons.

- Waterproof & floats in water
- LCD and key backlight on the front panel and the red LED light flashing to easily locate the radio
- 11 hours of battery life

3M™ PELTOR™ LITECOM

With 3M™ PELTOR™ LiteCom headsets communicating in noisy environments has been made easy – and safe. LiteCom is a tough and rugged headset designed to cope with demanding use in many different working environments. The built-in two-way radio lets you talk hands-free and work safely regardless of harmful noise levels.

GARMIN STRIKER PLUS 4CV CHIRP SOUNDER

Includes transducer for built-in Garmin CHIRP traditional sonar plus CHIRP ClearVü scanning sonar.

- Built-in Garmin Quickdraw™ Contours mapping software lets you create and store maps with 1-foot contours for up to 2 million acres
- Built-in GPS lets you mark waypoints, create routes and view boat's speed
- Bright, sunlight-readable 4.3" display and intuitive user interface
- Rugged design for every fishing environment

Windbreak & Ground Cover

Our windbreak and ground cover solution is a strong and durable fabric but also very flexible. Helping to block weed growth without the need for chemicals, our weed underlay membrane helps to minimize the need for weeding.

Our windbreak mesh offers protection from high winds and is ideal for shielding crops and polytunnels. Both types of membrane are easy to install, strong, durable and environmentally friendly. One of the best in market with 105gsm.

Sizing Available:

- 1 x 15 Metres
- 1 x 50 Metres
- 1.5 x 50 Metres
- 2 x 50 Metres
- 3 x 50 Metres
- 4.5 x 50 Metres

Clothing

After many decades of stocking marine clothing, the company has settled with the tried and tested clothing products for the professional fisherman such as Guy Cotton, Showa, Mullion and Dunlop. We are also proud to be Irish agents for Stormtex oilskins and floatation bibs.

JACKETS & BRACES

We provide robust jackets to withstand the harsh elements of the fishing industry throughout the world. Offering a wide range of Guy Cotton and Stormtex jackets that focus on comfort, tear resistance, safety, condensation and optimised vision. We also supply Guy Cotton, Stormtex and X-Trapper braces in various styles to ensure support, comfort and easy wear.

IMMERSION SUITS

Inherent buoyancy in excess of 80 N. This suit provides a minimum of 1 hour of thermal protection against cold water shock and delays hypothermia upon immersion, an extra thermal floatation liner is available providing 6 hours of thermal protection and a combined buoyance in excess of 160 N. Supplied with neoprene gloves & boots, additional neoprene hood for use in abandonment situations.

GLOVES

We supply a full range of Showa fisherman and builders gloves.

GUY COTTEN
TAKE SHELTER®

BOOTS

With comfort, safety and durability in mind, we stock a range of Guy Cotten and Dunlop boots for fishermen. Choose from heavy duty, lighter to wear and general purpose boots to suit your requirements.

FLOATATION

Tried and tested floatation products for the professional fisherman, from brands including Guy Cotten, Stormtex, Swansafe and Aquafloat. Guaranteed buoyancy, easy to wear and work in, fully waterproof and non-restrictive apparel to meet your inshore requirements.

SMOCKS & APRONS

SNG supply Guy Cotten smocks and aprons for the professional fisherman. Choose from the double-sided and tear-resistant smocks or heavy-duty aprons designed to control condensation

Fishing Accessories

Our range of Accessories are to compliment our core products. We pride ourselves in providing the highest quality of product, our fishing accessories are no different. For a full range of accessories, visit our website.

ROPE SPIKES

We provide a range of rope spikes in various sizes. Wire spikes available in sizes from 310mm to 700mm.

RIGGING SCREWS

Commonly known as bottle screws. Made from mild steel and a hot dipped galvanised finish. Ideal for tensioning wires and extensions.

STAINLESS STEEL RINGS

Stainless steel rings made from 316 stainless. Suitable for general purpose applications.

PLASTIC RINGS

High breaking strength cod end rings. Manufactured from specially modified nylon to increase resistance to breaking while in use.

FISHING BASKETS

Plastic fish baskets made from injection moulded lightweight polyethylene. Baskets are supplied with integrated reinforced handles or moulded handles for extra strength.

NETTING NEEDLES

Precision moulded nylon, heavy duty needles for rugged use.

KNIVES

SNG offer a comprehensive range of knives and accessories for the deckhand and onshore user. The Victornox range offers durability and workmanship and is widely known as the No.1 knife for fishermen.

BRAIDED HOSE

Highly flexible re-inforced PVC hose suitable for pump connections.

FLAT LAY HOSE

Protective cover for mooring ropes. Available in various sizes.

SHOVELS

SNG supply a plastic and aluminium shovel. Both can be adapted to harsh conditions due to their durable construction.

INSULATING TAPE

Available in various colours.

DUCK TAPE

Available in various lengths/colours.

MEASURING TAPE

Heavy duty 50m measuring tape.

CABLE TIES

An absolute must on every vessel for quick repairs and joining. Supplied in 8" or 14" lengths from robust to heavy duty plastic.

BOAT OARS

Available in 8ft and 9ft. Contact us for specific size requirements.

TELESCOPIC BOAT HOOK

High Quality Strong Durable Boat Hook From Trem. White line model. 120 - 196 cm - 30mm shaft.

Aquaculture

SNG Aqua specialises in everything Aquaculture. Our unrivalled products, dedicated aqua centres and in-house experts ensures you have the best products and setup on the market.

Aquaculture Services

SNG Aqua cater to all specifications of fish farms. We work with clients in an A through Z process to design strong lasting cage grid systems without compromising safety and quality.

Fish Farms

Your fish farm can support more sustainable fishing techniques that optimize production while being better for the environment.

Our Aquaculture nets are crafted from Dyneema, Nylon, HDPE and Polyester. This safely retains your fish stocks, while keeping predators out.

We cater to all specifications of fish farms and work with clients in an A through Z process to design strong lasting cage grid systems with compromising safety and quality.

BIRD NETTING

- All SNG bird nets are fully tailored to our clients requirements
- Our bird nets are available in HDPE, Dynice and Nylon netting
- We also supply bird net support poles

PREDATOR NETS

- This secondary net protects the main fish cage.
- It offers an extra defence as a preventative measure to protect against predators

FISH LANDING NETS

- We manufacture our fish landing nets or dip nets to any size or shape to suit our clients specifications.
- We design these with an aluminium frame and typically a nylon net

SWEEP NETS & CROWDING FLOAT LINE

- The sweep nets are made specifically for the type of cage and fish size required
- These are supported at the water line by soft floats
- The float line is a Dyneema rope strung through middle eye round hard floats; this design works great for crowding the fish gently

Aquaculture Products

FISH CAGE ENCLOSURE NETS FOR SALMON & TROUT

- Our process begins with a complete customer consultation to ensure that we have what they want made fully detailed and planned
- All our nets are manufactured to our clients unique specifications
- SNG nets are available in hand mounted and machine stitched options

We have a full range of netting, including:

- Nylon
- Polyester
- HDPE
- Dyneema

Netting options available in knotless and knotted netting across all materials.

MORT BASKETS

- Our service offers our clients the facility of pretesting the specifically designed basket before making your bulk order
- They are designed with robust construction and a 250kg holding capacity
- We ensure that the baskets are easy to use and do not disturb the fish when they are being lifted from the cage

BOX NETS

Our box nets are easy to use and are generally used when there is a requirement for a fish sample to be taken.

ROPES

- Full range of salmon and mussel farm ropes available
- Range of ropes from 6mm up to 80mm in diameter
- View our full range of ropes on page 34

SINKER TUBE SUPPORT ROPES

- SNG Aqua designed the application to hold the sinker tube at the exact depth with no spring. This ensures that it moves with the cage and net keeping it level and the net taut
- Each lifting rope has two rope eyes for strength and safety; these can easily be secured when the sinker tube is to be lifted
- This Dyneema rope has exceptional strength and has been designed to be used for a range of applications

DROPPER NETS

- These are used to collect mussel spat
- We construct these nets to our client specific needs from various types of netting
- All of our dropper nets are UV treated because of their close proximity to the surface of the water

BUOYS

View our full range of buoys on page 42.

TWINE

View our full range of twine on page 36.

FISHING ACCESSORIES

View our full range of fishing accessories on page 62.

CLOTHING

View our full range of clothing on page 59.

Dedicated Aquaculture Centres

SNG have two dedicated aquaculture centres. These are located on the North West coast of Ireland and on the coast of Shetland, Scotland.

We offer a wide range of equipment and team of specialists are always at hand.

Mooring System Solutions

Your operation is only as reliable as your mooring system. SNG can both design your mooring system and supply all the material and hardware for your mooring system, and whenever required we can oversee the installation.

We can offer complete, project-managed mooring system packages.

Custom mooring package design includes;

- Mooring analysis
- Initial mooring design with component specification
- Hydrodynamic testing
- Mooring supply
- Installation supervision
- Certifications for regulatory and insurance agencies

Hardware

SNG Aqua have a very strong and long relationship with Gunnebo Industries. As experts in hardware we know that our customers expect us to partner with the best manufacturers to ensure that we are consistently offering quality and innovation to our customers. At SNG Aqua our partnership with Gunnebo Industries was a natural fit for our Aquaculture Division.

We carry the full range of Gunnebo hardware, with the following selection applicable to the Aquaculture industry.

MOORING SHACKLE

The Gunnebo Mooring shackle no. 852 has been developed specifically for the Aquaculture industry, with its unique feature of a counter sunk bolt which locks the shackle, and with increased material thickness in the bow we have improved the fatigue resistance. With all Gunnebo's mooring shackles we are able to offer several securing options; standard or tailored. For many years the unique no. 852 mooring shackle has been used extensively in the Aquaculture industry.

Gunnebo Industries have improved this type of shackle through continuous improvement to satisfy the exacting demands of the Aquaculture industry. To fulfil one of these demands they have added countersunk shackle type A0830 to their portfolio of aquaculture products. They offer countersunk shackles both in Dee and Bow form.

HOT DIPPED GALVANISED CHAIN

Adverse weather and rough sea conditions, coupled with the harsh marine environment must be taken into consideration when you specify the correct equipment for your aquaculture facilities. Gunnebo's HDG chain is designed to meet the specific demands from the global aquaculture industry.

The chains are made from a premium high quality steel sourced from European steel producers to exacting standards and specifications.

Each element within the manufacturing process is stringently controlled with Gunnebo's in house quality systems; this also applies to our galvanizing and importantly our heat treating procedures which are critical factors in chain performance.

To prevent the risk of unwanted stress levels, each chain link is subjected to heat treatment after calibration in order to reduce the in borne stress

levels within it. Finally, each chain link is visually inspected after calibration.

The ultimate corrosion protection process for steel components in the marine industry is hot dipped galvanizing, this is again controlled to recognized marine standards. Gunnebo Industries have been producing galvanized chains for more than 50 years.

Corrosion protection by HDG.

COUNTERSUNK SHACKLE

Gunnebo Industries shackles are made from close tolerance high tensile steel and are quenched and tempered to comply with the most stringent specifications. All parts are hot dip galvanized and have a brown coat applied to the pin on top of the zinc layer.

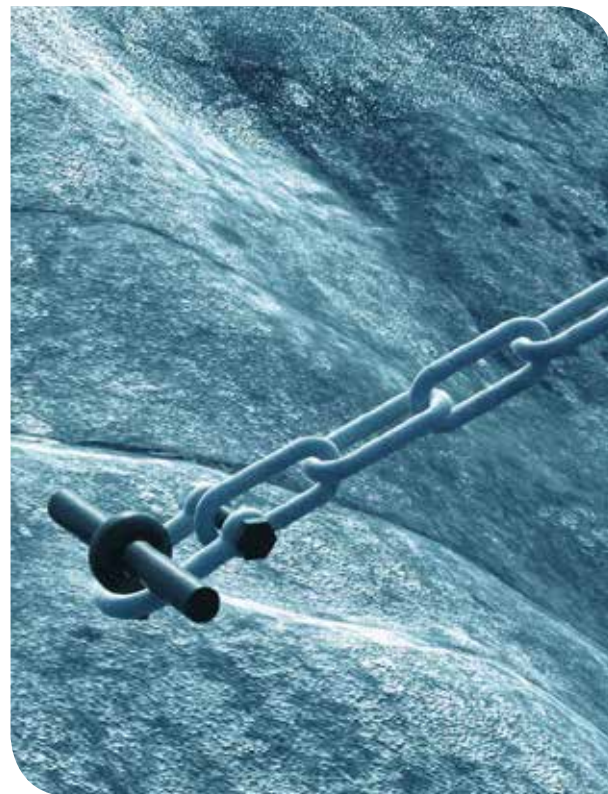

- Countersunk hole ensures easy/good tightening
- No risk to fowling the nets - No protruding parts
- Connecting (between two chain links) shackle for chain
- Shackle bolt to fit direct into ratchet, no extra tools or collets needed
- 3rd party approved to acc. NS 9415
- Hot dip galvanized pins (normally zinc plated)
- High quality HDG applied through stringent quality control

MOORING BOLT

Gunnebo Industries mooring bolts are made from high tensile steel and are quenched and tempered to comply with continuous monitoring and quality standards throughout manufacture. All parts are hot dip galvanized with a brown colour marking.

- Mooring bolts for both wedge and cement fastening applications
- Bolts are marked with MBL and traceability code
- Colour marking showing required depth of fastening
- Mooring bolts are 3rd part approved acc. to NS 9415
- User instructions available
- No A8252 - T-bolt flexible to secure straight/ correct line direction
- Certified according to NS 9415 incl. 3.1 material information
- All parts are high quality hot dip galvanized

HOT DIPPED GALVANISED CHAIN SLING

Gunnebo Industries chain sling are made from a specific material standard that has been proven to comply with the required industry standards.

- Flattened sections on the masterlink - make it quick and easy to fit thimbles
- All parts are high quality hot dip galvanized
- 3rd party approval acc. to NS 9415
- Short lead-time
- Three components in one product - one inspection point - one certificate
- High flexibility regarding lengths
- No protruding parts
- Available for LLZ- chain dimensions 13-22 mm

GALVANISED MASTER LINK

The Gunnebo master link are made from a specific quality steel grade to comply with the most stringent of aquaculture standards.

- Hot dip galvanizing is the industry standard for long term protection in the marine environment
- Flattening bow to make it easy to put on thimbles
- High quality HDG
- 3rd party approved acc. to NS 9415

Standard: Third party approved acc. to relevant Norwegian aquaculture standards

Material: high tensile steel. Quenched and tempered, Grade 6

Finish: All parts hot dip galvanized

03

Industry

Our 50 years of experience in the fishing industry in net design, rope innovations and hardware development has enabled us to offer our innovative products along with our world class service and expertise to companies in the construction, agriculture, safety, offshore and public amenities.

Offshore

SNG Offshore is a leading supplier of products and services for the marine and offshore industry. We are renowned for our reputation of providing superior products and an exceptional service.

Services

We can add simplification to your business by offering the convenience of dealing with a single agency for all your requirements. We are part of a strong marine suppliers network linking us to R&D in materials, design and product performance. SNG Offshore is a "one stop shop" solution provider for marine and offshore supplies. We only work with premium suppliers and manufacturers coupled with a competent service and prompt delivery makes SNG offshore your ideal supplier partner.

MOORING SYSTEM SOLUTIONS

Your operation is only as reliable as your mooring system. SNG can both design your mooring system and supply all the material and hardware for your mooring system, and whenever required we can oversee the installation.

We can offer complete, project-managed mooring system packages.

Custom mooring package design includes;

- Mooring analysis
- Initial mooring design with component specification
- Hydrodynamic testing
- Mooring supply
- Installation oversight
- Certifications for regulatory and insurance agencies

SHIPS AGENTS "ONE STOP SHOP MARINE SUPPLIER"

At SNG Offshore we recognise the inefficiencies ships agents are faced with when trying to fulfil a vessels port call requisition list.

With over 3000 maritime application products in stock and a strong marine supplier network, SNG can offer a "one stop shop" solution to ships agents, saving time and letting the agent get on with the vessels turnaround.

MOORING HARDWARE AND SUPPLY

Need mooring hardware? Our aquaculture experts have you covered with the latest aquaculture technology and mooring hardware.

- Engineered ropes – custom-finished in specific lengths and with finishing attachments (thimbles, etc.)
- High performance ropes including DynIce with Dyneema®
- Buoys
- Specialist mooring chain – all types
- Specialist mooring hardware
- Countersunk shackles, thimbles, master links, weld-less rings
- Connection plates and rings for rope grids

CUSTOM NETTING SOLUTIONS

We supply a wide range of custom made netting solutions. These include:

- Fall arrest netting for the construction industry – Eu Standard En1263-1
- Safety netting tailored to suit individual site and building requirements
- Offshore container nets
- Scaffolding netting
- Gangway nets
- Cargo nets
- Edge protection nets
- Windbreak and debris netting
- Anti litter nets
- Trailer cover nets
- Warehouse frame nets and
- Rope ladders

The quality of all these nets is second to none as with all our netting products across the range. Safety nets supplied are knotless polypropylene.

HELIX TAGLINE

Using a regular rope of poly, nylon or sisal has some inherent problems when used as tag line:

1. They tend to wrap around objects
2. They get caught in pinch points
3. The bottoms fray and are then knotted to stop the fraying causing the line to catch
4. They get slick when worn, wet or dirty with grease

The Helix tagline solves these problems, as it is specifically designed for the application.

Helix taglines are tangle resistant as it is designed with a rigid core & stiff overbrading to prevent any turning on itself and wrapping around objects. We have added an additional factor which is the spiral effect (HELIX), which will dramatically increase grip in wet & slippery conditions. Helix taglines are designed not to catch on pinch points, as there are no knots or areas to snag.

Features:

- Made from Dynlce SK 75 12mm with 6mm core (18mm) synthetic rope offering remarkable strength and light weight
- Weaved over braided cover to prevent abrasion
- Colour coded eyes and triple action karabiner with captive pin
- Specifically designed in conjunction with major drilling contractor for the desired application
- Tangle resistant
- Designed not to catch on pinch points
- No knots
- High visibility yellow outer braid
- Available in four sizes, 15ft, 25ft, 35ft and 45ft

Marine anti-tangle tag lines are manufactured from Dynlce SK 75 synthetic rope giving them exceptional strength and they are also lightweight for operator handling.

Each tagline has a soft over braided cover to help prevent abrasion. This similar technology is used in tow lines and gives the product its anti-tangle properties. There are four current lengths 15ft, 25ft, 35ft and 45ft each coming with a relevant colour coded eye for length identification. In addition to this there is a triple action karabiner with captive pin.

WRIN HANDLE

WRIN STR handles are designed to be attached to chain hooks to eliminate the risk of personal injury and to simplify the operation of the latch release trigger.

These STR handles are a must for the safety conscious.

The STR handle is designed to reduce exposure to accidents on sites where heavy lifting is carried out. Over the years there have been many instances of personal injury inflicted during the operation of attaching and releasing chains and slings from chain hooks.

The new STR handles are designed to eliminate the requirement of placing parts of the hand inside safety latch hooks while attempting to operate the release trigger.

The STR handle can be attached to the chain hook simply without compromising the integrity of the hook's design and capabilities. The handle is clamped to the hook and fixed by replacing the hook's trigger pin with a longer bolt. The STR handle can be fitted to and removed in a minimum of time with a minimum of tools in any location.

The STR handle is made of quality 316 Stainless Steel. The design includes a hole for attaching a lead line for easy retrieval.

GRABIQ

Reduce the cost – increase the efficiency

The GrabIQ system makes your lift quicker, safer and easier. The all-inclusive chain sling system for coupling, shortening and lifting in grade 10 is designed to improve your lifting actions and make it as quick and easy as possible. Some of the top features are:

- Less components – cost efficient
- Built in shortening function
- Light weight for better ergonomics

Agriculture

Our agriculture range extends to all areas of farming and horticulture. From silage cover netting to ropes, hardware and clothing, our agriculture range has everything to fulfil your requirements.

Nets

Ideal for preventing birds from entering grain stores, covering bales and silage pits, as well as protecting aviaries and bird enclosures. For the horticulturalists, we have all the netting you need to protect pond life, as well as weed control fabric and windbreak nets for gardens, allotments, orchards, and polytunnels.

BIRD CONTROL

Nets for bird stock control in paddocks, such as in fowl farms, aviaries or keeping small birds out of sheds and grain stores.

SILAGE & BALE COVER NETS

Silage cover nets to help eliminate bird attacks on plastic covered silage, haylage and pits.
Helps to keep bales sealed to optimise nutrients within the bale.

FENCING

Use netting to fence in small animals or extend an existing fence.

POND COVER

- To protect fish stocks such as Koi Carp.
- Secure against people or animals who get too close to pond edges from falling in.
- Keep birds or predators out of your pond.

WEED CONTROL

Weed control fabric is used for a variety of purposes but is mainly used with the aim of suppressing weed growth while allowing water to soak away.

WINDBREAK & SHADE NETTING

Made of strong and durable polyethylene mesh. All our sizes are UV stabilised to protect from long time exposure to harmful UV rays.

Hardware, clothing & ropes

HARDWARE

We supply a comprehensive range of hardware which is produced to the highest manufacturing standards in the industry.

CLOTHING

We provide protective clothing for many different applications. Hi-vis vests and coats to ensure you are seen, overalls and gloves for chemical protection, helmets to prevent head injuries and waterproof gear to keep you dry.

ROPES

Our product range includes operating ropes for mowers and pulling ropes for manure scrapers, as well as components for poultry feeding systems. We develop tailor-made solutions and manufacture the perfect rope for each of your applications.

Safety

We supply safety equipment tailored to suit each industry's requirements, including construction, transport and vehicle.

We offer a wide range of nets, ropes and chandlery for lifting and towing including taglines, Dynlce rope and a wide variety of plaited and multi strand ropes.

Nets

FALL ARREST NETTING

Put your trust in our fall arrest netting. Made for the construction industry to EU Standard EN1263-1, our safety nets are unrivalled in strength and impact resistance.

Standard net sizes are in stock at all times with customized options also available to meet your specific site or building requirements.

Our personnel safety nets supplied are constructed from heavy duty knotless polypropylene and is fully UV stabilized for extra safety and durability.

GANGWAY NETTING

5mm x 45mm square mesh netting.

DEBRIS AND SCAFFOLDING NETS, WAREHOUSE NETTING

- Rope ladders/pilot ladders
- Tow Ropes
- Taglines

Wire Ropes, Hardware & Chandlery

WIRE ROPES

- Galvanised
- Stainless Steel
- PVC Coated
- Various sizes

ROPES

Regardless of which agricultural equipment you operate, we have ropes for loader wagons, rakes or feeding boxes. Our product range also includes operating ropes for mowers and pulling ropes for manure scrapers, as well as components for poultry feeding systems. We develop tailor-made solutions and manufacture the perfect rope for each of your applications.

- Nylon
- Polyester
- Polysteel
- Polypropylene
- Dynice Rope

TWINE

- Nylon
- Polyester
- Polysteel
- Polyethylene
- Polypropylene
- Braided or twisted; 2 kg spools

HARDWARE AND CHANDLERY

We supply a comprehensive range of hardware which is produced to the highest manufacturing standards in the industry.

- Rigging Screws
- Turnbuckles
- Shackles
- Wire Grips: DIN1142 or Commercial grade
- Thimbles
- Carbine clips: galvanised or stainless
- Blocks
- Swivels
- Chains: all grades

Clothing

Our range of clothing has been created to help you find the right workwear for your job. We provide protective clothing for many different applications. Hi-vis vests and coats to ensure you are seen, overalls and gloves for chemical protection, helmets to prevent head injuries and waterproof gear to keep you dry.

WE STOCK

- Helmets

Pyrotechnics

SNG are a distributor for the world renowned Hansson Pyrotechnic group of Sweden.

This pyro has a distinct advantage to its competitors as its time expiry date is 1 year longer than other brands. SNG have secured the capability of holding large amounts of pyro with the local authorities and the department of justice in our custom built pyro store.

This gives us the advantage of holding large quantities and classes of pyro required for the marine and leisure markets. This is also gives us the ability, in co-operation with the department of defence, to dispose of time expired pyro technics. If costumers are purchasing new pyro from SNG and have old pyro outside of the Hansson brand we can still provide the disposal service for these.

Construction

Our construction nets are heavy-duty and fully UV stabilized for extra safety and durability. Unrivalled in strength and impact resistance, we offer customized solutions to meet your specific site requirements. We are experts in concrete fibers, ropes and lifting hardware.

FALL ARREST NETTING

Put your trust in our fall arrest netting. Made for the construction industry to EU Standard EN1263-1, our safety nets are unrivalled in strength and impact resistance.

Standard net sizes are in stock at all times with customized options also available to meet your specific site or building requirements.

Our personnel safety nets supplied are constructed from heavy duty knotless polypropylene and is fully UV stabilized for extra safety and durability.

TAGLINES

Our Helix tag lines are made from Dynlce SK75 and have been designed to be tangle resistant. They have been created with a rigid core & stiff overbrading to prevent any turning on itself or wrapping around objects.

We have added an additional factor which is the spiral effect (HELIX), which will dramatically increase grip in wet & slippery conditions. Helix tag lines are designed not to catch on pinch points, as there are no knots or areas to snag.

NETS

Whether you require a scaffolding netting system to catch falling debris, personnel, or a combination of both, we have safety nets to suit every construction site.

3M™ PELTOR™ LITECOM

The 3M™ PELTOR™ headsets are ideal for communicating in noisy environments. LiteCom is a tough and rugged headset designed to cope with demanding use in many different working environments. The built-in two-way radio lets you talk hands-free and work safely regardless of harmful noise levels.

CLOTHING

Our range of clothing has been created to help you find the right workwear for your job. We provide protective clothing for many different applications. Hi-vis vests and coats to ensure you are seen, overalls and gloves for chemical protection, helmets to prevent head injuries and waterproof gear to keep you dry.

Concrete Fibres

1. POLYEX DURO

- Concrete reinforcement macro fibers
- It turns concrete into a reinforced composite material
- It increases flexural toughness and energy absorption performance
- The impact and corrosion resistance are also enhanced

Advantages of Fibre Concrete

- Excellent energy absorption performance
- Very high flexural toughness
- Reduces the spalling possibility of the concrete edges
- Precise placement of steel mesh is not required, reducing the labour necessary to place and handle
- Improves the mixture by reducing the potential of concrete segregation
- Reduces the overall bleed and consequential settlement cracking
- Removes the potential risk of corrosion of steel crack control mesh
- Cost effective versus steel mesh
- Ecologic, safer and lighter than steel

2. POLYMICRO

- Concrete reinforcement micro fibers.
- Ideal choice to control the microcracking at early ages.
- This secondary multidirectional reinforcement restricts the plastic shrinkage cracking, improving fatigue resistance and concrete toughness.

Advantages of Poly Micro

- Reduce plastic shrinkage cracking;
- Improve fatigue resistance;
- Increase concrete toughness;
- Reduce plastic settlement cracking;
- Improve durability;
- Reduce bleeding;
- Alternative to crack control

3. POLYEX MESH 1000

- Concrete reinforcement macro fibers.
- It turns concrete into a reinforced composite material that slows crack propagation and reduces plastic shrinkage cracking.
- Impact and corrosion resistance are also enhanced.

Advantages of Poly Micro

- Reduce plastic shrinkage cracking;
- Improve fatigue resistance;
- Increase concrete toughness;
- Reduce plastic settlement cracking;
- Improve durability;
- Reduce bleeding;
- Alternative to crack control

Hardware for Lifting

1. THE GRABIQ SYSTEM

Our GrabiQ Grade 100 range features integral shortening, reduced number of components and more flexible use of chain slings. This provides a modular concept for cost effective lifting solutions that covers a wide set of applications.

2. ARCTIC OFFSHORE

Adverse weather and rough sea conditions, sometimes in combination with extremely low temperatures, must be included in the design of offshore lifting sets. Our offshore range is produced from steel that gives improved impact strength at low operating temperatures, as well as reduced risk for hydrogen embrittlement.

3. LIFTING POINTS

Our wide range of lifting points allow us to provide complete solutions developed for each customer's needs, enabling improved operational efficiency for our customers. All of our Lifting Points are CE marked. Each lifting point has been proof loaded to 2.5 times the Working Load Limit and visually inspected by a licensed inspector before leaving the factory.

4. SHACKLES & RIGGING SCREWS

Our shackles are made from a range of steel qualities, including acid proof stainless steel and high grade alloy steel to comply with the most stringent specifications. Parts of our shackle range are Type Approved to DNV 2.7-1.

5. CHAIN & LIFTING COMPONENTS

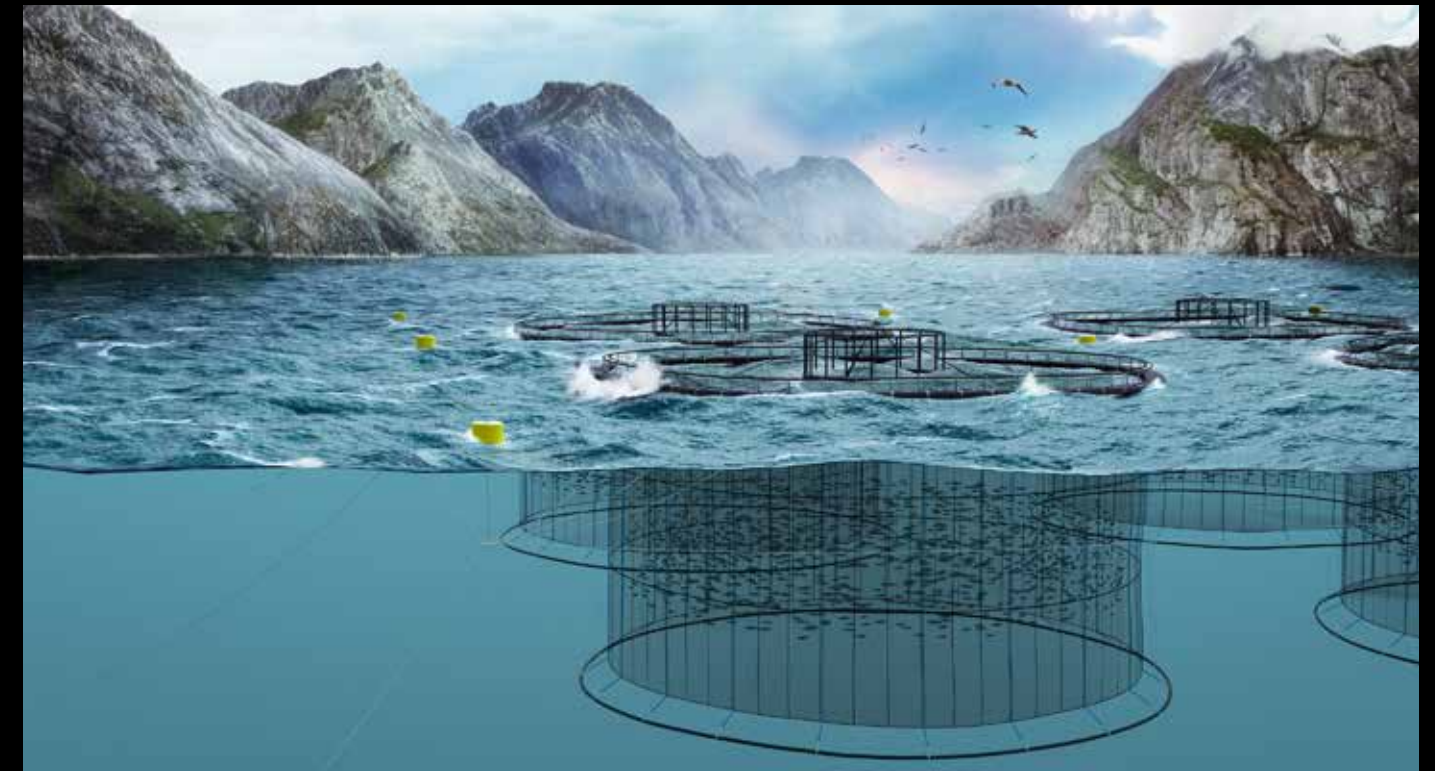

Our chain and components are made from special quenched and tempered alloy steel that guarantees high strength, low weight, high wear resistance and long life. All lifting components are uniformly marked with chain size, grade, manufacture's designation and name. Every individual component and chain link is tested to the Manufacturing Proof Force before leaving our factories.

6. LASHING COMPONENTS

The chain tensioner from SNG is integral in one set. It is made of high strength Grade 10 material and the ratchet handle contributes to a fast and ergonomic lashing procedure. The GT is fitted with safety pins to prevent unintended release of the threaded end fittings.

Public Amenities

SNG supply a comprehensive range of netting, rope and hardware for public amenities, with a wide variety of twine and mesh sizes to suit all needs. We offer high tensile strength nets and fencing for landfill sites, Astro parks, aviary enclosures, zoos and safari parks. Should you require, our experienced team can also arrange installation of nets and frames.

Nets

We have a wide range of netting including permanent and movable nets. Along with supplying these nets we can also arrange installation of nets and frames.

RECOVERY NETTING

SNG manufacture a bespoke net rope for waste water areas. Our specialised ladder system allows personnel to access the area for both climbing in and out safely.

LANDFILL NETS

Our range of landfill netting covers everything from waste disposal, to transport and recycling.

- Full installation of permanent and temporary netting systems
- Vast experience in working on many waste disposal sites
- Permanent timber pole or steel structures
- Temporary timber pole or steel structures
- Relocation of nets around sites
- All relevant paper work and certification in order for onsite works

RECYCLING CENTRE NETS

- Small and large mesh netting
- All UV stabilised
- Strong breaking loads
- Help prevent paper and lightweight waste from being blown off conveyor belts or from leaving recycling yard areas
- Helps to contain waste to preferred area of work

ZOO

- Netting for small animal enclosures
- High tenacity polyethylene with stainless steel filaments running through for extra strength
- Climbing nets for primate enclosures

AVIARY NETS

- Nets to provide enclosures for all avian species including birds of prey
- A good lightweight and reliable way of closing off bird enclosures
- A wide variety of meshes to suit all Bird sizes and types

SKIP NETS

- Our range of transport nets are ideal for all types of trucks and skips.
- Our heavy duty cargo nets are specifically designed to secure loads during transport to safely contain loose, bulky loads effectively.
- All transport nets can be manufactured to specific sizes, densities and colours to suit individual containers and skips, and can also be used by air or sea freight carriers.
- Produced from heavy duty polyethylene and featuring reinforced edging, our nets are unrivalled in strength and durability.

PERIMETER NETTING

This netting is used in a variety of different applications. Landfill and forested areas are extremely common.

Rope & Hardware

Our expertise in hardware and rope allows us apply it to different applications in both an innovative and functional way. We have access to the highest quality hardware and rope providers in the world and we work closely with them to ensure that we are always providing a suitable product for our customers specific needs.

GALVANISED WIRE ROPE

CARBON CLIPS

Galvanized for longer life. Durable spring opening system. Smooth edge finish.

DYNICE ROPE FOR INDUSTRIAL MACHINERY

Dynice ropes are widely used in commercial fishing, seismic mooring, tugging, yachting, lifting, leisure, off road and military sectors. The main focus of this 12 strand rope is strength, smooth surface and roundness.

Sports

At SNG we offer the full service in regards to your sports nets needs. After our onsite consultation process we design, manufacture and install your nets to your specific requirements. We cater for all structures, from steel to wooden. Our highly experienced team will guide you in the best solution for you club.

Sports Nets

We have a wide range of netting for all sports including GAA, soccer, rugby, golf, cricket, hockey, tennis, basketball and badminton.

Ballstop Nets

Hurling and Gaelic Football Ball stop nets. All net dimensions catered for. Permanent or retractable nets. Full installation available on request. The best quality netting on the market. All nets are high tenacity (135kgf breaking load) with UV Stabilisation as standard. All rigging such as wire, tensioners and all related hardware also available.

BALLSTOP NET OPTIONS

- Hurling
- Gaelic football
- Soccer/football
- Home use
- GAA Go Games
- Junior Gaelic football
- Astro pitches
- Public parks

NETTING SPECIFICATION

- Dimensions available: Tailor made, standard sizes available to buy online
- Material: High tenacity polyethylene
- Colours available: Green or black
- Fully UV Stabilized for a minimum of 7 years
- Breaking force available: 135kg, 200kg
- Reinforced edging, 12mm rope
- Rings or clips available on edges
- Stationary or retractable ball stop nets available
- All wire rope and rigging needed for this product available on request

Goal Nets

Goal nets manufactured from the highest quality twine and material. Unrivalled in strength and durability, all nets are fully UV stabilised, ensuring they won't be affected by prolonged exposure to sunlight.

GOAL NET OPTIONS

- Hurling goal nets (Standard size)
- Gaelic football (Standard size)
- Soccer goal nets (Standard size)

Non Standard Sizes Available
Wide range of accessories available

NETTING SPECIFICATION

- Twine: Twine 50mm, 100mm and 120 mm square mesh x 3.2 ml
- Colour: White
- Fully UV Stabilized
- High tenacity polyethylene
- Breaking force: 105kg
- Reinforced edging
- Support rope for stanchion
- Sold as set of 2 nets

TESTIMONIAL

The project brief was to supply and fit ball stop netting at Swilly Park, Ramelton, Co Donegal. SNG Sports were selected as the preferred vender. Under the stewardship of Glenn McBrearty, the pros and cons of the various design options were imparted in a clear and concise manner. The finished product is a true testament of the professionalism of the organisation and we would highly recommend the services of SNG Sports to any third party.

Astro Parks, Public Pitches & Sports Centres

We manufacture and install astro pitch and public park netting throughout Ireland and the UK. Our high quality and fully tested netting is fundamental to ensure our customers' end result are of quality and longevity.

CARGO NETS & CLIMBING NETS

Sturdy rope construction. Only top quality ropes are used in the construction of these nets.

DISCUSS / HAMMER THROW NETS

Discuss/ hammer enclosure or barrier nets in nylon or polyethylene netting. High resistance to impact of hammer and shot putt. UV stabilised against long exposure to sunlight.

TENNIS NETS TOURNAMENT STANDARD

Heavy duty white PVC tape at top of net. Black tape on 3 sides. Plastic coated galvanised wire rope at top of net for tensioning net. Double layer of netting at top.

BADMINTON

White PVC tape at top of net and Black PVC tape on 3 sides. Suitable for club or tournament use.

BASKETBALL NETS

Standard size for standard size basketball ring.

HOCKEY

Hockey goal nets. Standard size.

VOLLEYBALL

Tournament standard nets. White PVC tape at top with black tape on 3 sides. Plastic coated, galvanised wire on top edge for tensioning.

Hardware & Rigging for Ball Stop Nets

As trusted sports net manufacturers, we also supply a wide range of sports net accessories. Our range includes galvanised wire rope, galvanised/PVC coated rope, rigging screws, wire grips, carabine clips, nylon rings, eye bolts, pulleys, ratchets, ropes plus a wide variety of shackles and chandlery.

Product Range

Our range includes:

GALVANISED WIRE ROPE

GALVANISED/PVC COATED ROPE

RIGGING SCREWS

WIRE GRIPS

CARABINE CLIPS

NYLON RINGS

EYE BOLTS

PULLEYS

RATCHETS

ROPES

STAINLESS STEEL WIRE

PLUS A WIDE VARIETY OF SHACKLES AND CHANDLERY

SNG Net Care

SNG offer a net care solution, in which customers can sign up for an annual subscription to maintain the care and maintenance of their SNG nets. Net Care includes biannual tests and inspections to identify issues requiring repair work.

NET CARE SUBSCRIPTION

- Full Inspection on the complete structure installed.
- Checks are carried to ensure that all wire rope is secure and tight. Stay wires, top and bottom wires and any intermediate wire ropes are in place correctly.
- Test timber poles to ensure that they are structurally sound
- Full inspection of nets to check against holes or tears in the netting or ropes
- Remedial repairs will be carried on wear and tear.
- A full SNG Sports report will be given with any recommendations
- 2 checks per Year

Net Care is available on SNG nets only.

NET REPAIRS

If older nets need repaired or have been damaged by wind, vandalism, or a lawnmower, repairs can be carried on your grounds by our experienced staff or alternatively, at our factory.

All accessories are available from SNG sports.

SNG Shop Killybegs

SNG Shop Killybegs along with being your one stop shop for marine products we are also a Guy Cotten flagship store. We provide the full range of the Guy Cotten fishing range.

FISHING TACKLE

We have a large range of fishing rods and tackle in our Killybegs store. We stock amazing brands such as JRC, Hardy's, Berkley, PENN and Shakespeare to name a few.

POTS, ROPE AND HARDWARE

We have a designated pot, rope, hardware and lifting sections in our state of the art shop. Our staff are trained to the highest standards with unique industry knowledge and experience.

OUTDOOR BRANDS

As we are on the foot of Slieve League along with the beautiful Donegal landscape we are here to cater for your hiking, walking and general outdoor activities. We stock high end brands such as Columbia, Rab, Merrell and Mountain hardware. Our clothing is both high functioning and beautiful at the same time.

How to order

BY PHONE

Our helpful and knowledgeable customer service team are always happy to help:
